

2.14. Levashov's Genius and his LEGACY in the Transition Period. Part 3.

Author: Author: [Bittner E.A.](#)

Part 3. PROACTIVE STRATEGIES - "SvetL" is walking across the planet.

...We continue to explain the role of the **"SvetL" Programs** in Proactive Transition Strategies, based on the text of the Interactive Scientific Conference of the Scientific Research Institute TSUS. In particular, their roles in **"How to give Russia the appearance of the future in the new World order"** http://www.salvatoremm.ru/?page_id=2729:

"First of all, it is necessary to realize the existence and features of the Transition period that has begun, its program duration, **the unconditional fulfillment of the processes of changes taking place in the entire surrounding reality**, first of all, as a change in the entire Structure of the existence of energies, **their management and all irreversible and mandatory changes in the existence of people**, as a consequence.

No less significant is the awareness of the fact that the changes taking place in the whole essence of future existence (or non-existence) **on planet Earth are independent of the will and desire of people**. It is for Russia that a completely different **functional programmatic endowment is imputed**, both of **an actively influencing nature and of passive complicity in the process** of changing the entire existing world order."

The important role of the "SvetL" Programs as a Proactive Strategy to deter aggression and "rebellion of consciousness", as well as to preserve the Brain and people's Lives during the Transition Period by changing the entire Structure of the existence of energies, we have considered in detail in previous parts of this work. But by itself, the presence of such Programs will not be sufficient. People should learn how to use such Programs and the effect of the action depends on the prevalence of these programs among the population of the planet. **This is exactly the case when quantity turns into quality.**

N. Levashov has repeatedly stressed how important it is to create a unified Russian mental system in order to break the blockage of development imposed by the interventional Control System. By the power of his thought and with the help of people who attended his monthly meetings with readers, such an operation was successfully carried out. The parasitic System was broken and the native Earth Control System was put into operation.

Anticipating possible scenarios for "ten" or more steps forward, Nikolai Viktorovich **understood** that sooner or later **the enemies would get to him and eliminate him**. The "beacons" of Reason that he managed to ignite among readers were still unstable, the sprouts of understanding were fragile, and the habits created by the parasitic system were still strong. **His "SvetL" technology was supposed to solve not only the problem of recovery, but also to maintain a sufficient energy level** during a difficult Transition Period. Moreover, the number of such "beacons" **should have been sufficient** to maintain a critical mass of a certain quality capable of withstanding the pressure of parasitic convulsive actions. Today, **those who do not want to lose control over people are trying very hard to prevent this set of "critical mass"**.

For attentive readers of N. Levashov's books, it has not escaped the fact that the parasites themselves will not let go and will suck blood until the victim dies. How to remove the parasite? "Sprinkle with salt" so that it falls off? Levashov talked about this at his meetings. Except that under the phrase "sprinkle salt" he meant something known to him alone. Let's try to determine what was put into these words:

"Only when a person himself understands the consequences of each of his actions and **HIS RESPONSIBILITY FOR what he has DONE**, then and only then can a person be truly free! **When**

a person realizes that he does not receive punishment for a crime committed in the courtroom, and it is impossible to escape from this punishment by any absolution in the church, only then will a person understand that punishment (or encouragement) occurs at the time of the act itself! And only then will social parasites lose the opportunity to manipulate the consciousness of each person and the consciousness of the masses in general."

"... the genocide of the Rus was carried out for one simple reason - the social parasites understood perfectly well that **it was Russia, it was the Rus, who would become the driving force** that would sweep the world parasitic system out of its path and free the whole world from their power. And they wanted to destroy the Russian people, Russian culture, so that **THERE WOULD BE NO ONE TO LIBERATE THE WORLD FROM SOCIAL PARASITES!** And the fact is that it was the Rus who preserved, at the genetic level, the high evolutionary number that our ancestors had! It is the Russian people who have a minimal evolutionary bias caused by the mixing of races with a large difference in evolutionary numbers."

"... **at the level of genetics, the Slavic-Aryans had a direct connection** with the Light Hierarchs, whom they called Gods. So, due to the fact that after the last planetary catastrophe, which threw the entire civilization of Midgard-earth to the level of the Stone Age, most of the survivors and their descendants could not independently protect themselves from the negative influence of Dark Forces, especially during the Night of Svarog, and having pronounced the glory to one or another Hierarch - "God", our ancestors thus in this way, restored their connection with him and fell under the protection, under the protective field of one or another Hierarch, regardless of which planet-Earth he was on. In order to provide optimal protection for the maximum majority of Slavic-Aryans, each family of Slavic-Aryans turned to their Patron God. But even having an energetic connection with the Hierarchs-Gods on a telepathic level, which was strengthened by mental or verbal appeal to this or that Hierarch-God, our ancestors could not protect themselves in this way from the influence of Dark Forces, primarily because social parasites were already ready to block this connection with the Hierarchs-Gods of the Slavic-Aryans. And as a result, the Dark Forces were able to neutralize this **protective connection**, and as a result, having no more external protection of the high Hierarchs of Light, the people of the Slavic-Aryan Clans remained practically defenseless against the actions of the Dark Ones, especially during the last Night of Svarog. ... And the main reason for the impossibility of obtaining protection from one or another God-Hierarch of our ancestors is that almost all the descendants of the Slavic-Aryans have been blocked by the actions of social parasites for the last thousand years."

The following conclusions can be drawn from this information:

1. It is necessary to fully **UNDERSTAND** the consequences of your actions. Understanding the consequences does not allow a Person to act automatically, irresponsibly. This changes the quality of a Person's Essence and his behavior. Social parasites can no longer control such a person through his emotional level. And the energy parasite, as "sprinkled with salt", falls off by itself, because the qualities are mismatched. The parasite bounces off like an electric discharge from such a person. However, at the same time, he is looking for another suitable victim who,

for one reason or another, has suffered stress, or has independently adjusted to the level of thinking of the parasites, practicing meditation or other energy practices without understanding them.

2. Genetics and the evolutionary number of Essences also have a powerful resistance to the control of parasites, but, unfortunately, the genetics of many people are weakened by the methods of genocide: vaccination, GMOs, alcohol, etc. But even so, the power of genetics is higher than that of the long-enslaved peoples of the Wild West and the Middle East. It is worth waking up sleeping genetics - and interest in UNDERSTANDING and striving to understand everything will wake up. This can also be called "sprinkling with salt", since the blocking connection is destroyed!

3. **Restoration of communication** with the gods-Hierarchs (read with the native Control System). As soon as the Human Brain overcomes the blocking barriers of the planetary level of interventionists, there is a reunion with the Brain of the native CPS. Overcoming is possible only under the first two conditions, if they are helped by the **Source of Life**. After all, it is for this that the IZ was installed in the bowels of the planet by the Ancestors:

The Powers of God's helped create,
directing their lives to good deeds...

THE RACE WAS FUELED by a cherished source,
what has been preserved in the tracts of the ancients...

The Gods foresaw the Darkness on Midgard,

And the **RACE** decided to help **OUR DESCENDANTS**...

In the present Transition Period, the energies that remained after the Change of the System Power are being rebuilt. If earlier people of homogeneous genetics lived in certain places where the Source of Life came to the surface, then after technological progress Humanity became very mixed geographically. The descendants of the **RACE** settled around the world, but the properties of genetics have been preserved for some. They also understood the meaning of what Nikolai Levashov said and are able to connect individual pieces of events into a single picture of what is happening. To reveal the potential of such a Brain, a program was created for INDIVIDUAL feeding with the GENERATOR of Primary Matter - the **SOURCE OF LIFE - "SvetL"**. There are more and more such "SvetL" people. Recently, the "**Russian Scientific and Technical Society**" (**RNTO**) has compiled a Geographical "SvetL" map, which clearly demonstrated the "beacons" of the unlocked mind on the map of our planet.

As you can see on the map - the main part of the awakened genetics and the unblocked mind is located on the territory of Russia.

Viewing the map in its original size:

http://img-fotki.yandex.ru/get/9250/236519248.0/0_e93..

We return in this regard to the text of B. V. Makov:

"It is for **Russia** that a completely different **functional software endowment is imputed, both of an actively influencing nature and of passive complicity in the global event chronoprocess**, including one associated with the need to change the entire existing world order."

The same leading role in the **embodiment of the new Mind** was predetermined for Russia by Nikolai LEVASHOV. Despite the fact that social parasites still managed to infect many Russians with **ambition**, in the worst sense of the word, genetics, **the ability to think and draw the right conclusions, the "SvetL" technologies** have done their job! The dense blocking blanket that has been covering sleeping Humanity for millennia was interrupted not only over the territory of Russia. It has also broken through in Europe, America and Australia:

The awakened mind preserved life on the planet. Thanks to the genetics of a high evolutionary number, the "beacons" of intelligence, we are all given another chance - **the restoration of the process of development of a Civilization of Intelligent orientation on Earth.**

Despite the malefactors and various "stargazers", through whose motor functions the fading impulses of the old Ebrov CPS manifest themselves, "SvetL" is walking across the planet! Whether anyone likes it or not! This is an inevitable process!

"The transfer of the conditions of cohabitation of the population in all spheres of organized life of multinational Russia, as well as the unconditional transition to a new structure of the social order of society is inevitable. Such conditionality is dictated not by some weakly generating unfounded conjectures of a political nature of the currently governing temporary remnants of an insignificant "liberal-democratic" minority, but by the Goal Vector of the embodied changes in the general chronoprocess, which directly affect the formation of the individual and public

consciousness of the majority of people in Russia, against which even the currently organized state violence will not be able to resist".

The revival of Russia - "this is a separately expressed stage of the beginning of the reconstruction of the previously destroyed true target states of development and endowed with functions of the Earth as a governing and controlled System at the same time, including the process of **recreating a truly Intelligent Human** with all his essential significance as **an integral element of civilizational earthly development, as a whole.**"

"Russia is preparing for something extremely grandiose, but not against everyone or anyone, rather, in the name of everyone!"

RNTO, Elena Bittner, 02/16/2014
