

1.25. The role of "SvetL" programs in the energy-informational support of a person!

Author: [Boreyko V.M.](#)

WE ARE CONTROLLED BY VIRTUE OF OUR UNDERSTANDING, BUT WE ARE ALSO CONTROLLED BY VIRTUE OF OUR MISUNDERSTANDING! THEREFORE, A PERSON SHOULD NOT BLINDLY TRUST EVERYTHING THEY ARE TRY TO IMPOSE ON HIM, HE MUST LEARN TO ALWAYS SEE THE CONNECTION BETWEEN CAUSE AND EFFECT, ONLY THEN WILL HE BE ABLE TO REMOVE ALL OBSTACLES IN HIS PATH!

So, we continue our acquaintance with the "SvetL" wellness programs.

In a previous publication, I promised to systematize and conceptually, i.e., at the level of everyday language use, **TO CONVEY TO YOU MY IDEAS about the ROLE of "SvetL" PROGRAMS IN THE ENERGY AND INFORMATION SUPPORT OF A PERSON.**

Based on the knowledge that became available to me after studying the WORKS of N. Levashov, A. Khatybov, B. Makov and other authors, I will explain by examples what the "SvetL" Programs are.

To begin with, let's TRY to figure out what the Human body really is, not from the position of a pathologist?

The thing is that after we lost our **FIGURATIVE** language (that's right, **the LANGUAGE-I am speaking**), many forms and interpretations of the same phenomenon, goal, event and action appeared. To make it clearer, the same phenomenon is called differently, i.e., different words are used to describe it. Therefore, it is difficult for many readers to navigate and distinguish truthful information from false!

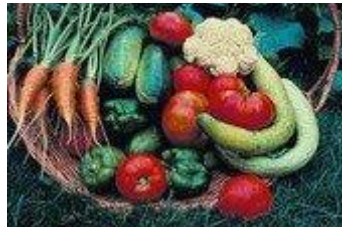

So!

Option one! The human body (as N. Levashov teaches us) is a

multilevel matrix (Russian Doll [Matryoshka]), which consists of several bodies. I will not write how many specifically, because their quantity and quality are different for each person. The human body is the interaction of soul and body! In other words. **The soul cannot develop without the Body, and the Body cannot live without the Soul! The physical body is just the tip of the iceberg,** a mirror of more complex processes that we, due to the imperfection of our

senses, cannot yet see.

These manifestations also exist in flora (a collection of plant species). Look at a meadow of wildflowers! They are different in their structures, colors and qualities, but, in general, they are distributed in such a way that they harmoniously combine with each other and fill this space with a palette of radiated and absorbed energies. At the level of feelings, we delight in perceiving this natural color ensemble.

Have you ever wondered **why plants, different in appearance, quality and structure, grow and bear fruit on the same plot, fueled by the same soil?**

For example! We take the soil and plant different plants in it and get a harvest of different varieties and types of vegetables, fruits, etc. What do plants actually use for their growth and reproduction? What kind of invisible Energy controls this process? Do we see everything at all? And what part of nature do we learn in educational institutions? The answer, unfortunately, has a sad connotation, because we learn and memorize unsubstantiated postulates. **The whole point is that the manifested world is just a consequence or the visible tip of the iceberg of NATURAL PROCESSES OCCURRING ON EARTH AND CONTROLLED BY THE EARTH'S CONTROL SYSTEM established by our ancestors (in the Slavic-Aryan Vedas - "The Source of Life")...**

Option two.

A brief description of the Human body from A. M. Khatybov!

A person is a multi-layered object. What we see are ionic (proton) structures, or a shirt (body) clad on an antineutron shell containing a neutron base, or a platform for a neutrino structure (or matrix) called the brain." The Human Brain is a complex complex that controls every cell of the body, the control is carried out by gravito-magneto-electric impulses, magnetic impulses, strictly quantized magnetic and electric potentials.

Option three.

Description from the Bible! "The Old Testament"

Gen. 1:27 And God created man in his own image, in the image of God he created him; male and female he created them.

But then the Lord God appeared in the second chapter and began to create after the creation of God.

Gen. 2:7 And the LORD God created Man from the dust of the Earth, and breathed into his face the breath of Life, and Man became a living Soul.

You see the difference! In the first case, in his own image and likeness, and in the second, from the dust of the earth??? Interesting, isn't it? There is something to think about!

As you have managed to notice, none of the descriptions about the origin of Man is consistent with the traditional "scientific" point of view.

Just in time, they sent me material that clearly proves that even today there are phenomena that cannot be explained by modern science: **Phantom or false pregnancy**^[1]

Cases of "immaculate conception" have become more frequent in the USA^[2]

Regarding science, A. M. Khatybov put it very accurately: **"The direct proof of the absence of science is the presence of the church."** The question arises, why? Who is right? Traditional science, which is based on **the OPINION of "pathologists" from medicine and works only in the field of the material**, i.e., the manifested world as a consequence of what is occurring at other levels and with a higher octave of the frequency impact of energy-informational processes controlled by the **EARTH'S MANAGEMENT SYSTEM**. And if we also add here the original (primordial) figurative alphabet of the Slavs, where each symbol has its own meaning depending on its location in the word, then we get another cube for understanding the general controlled process of **LIVING NATURE**.

By the way, the syllabary/alphabet of the Slavs is also a kind of "Matrix" that has 49 characters, which have seven vertical levels and seven horizontal. And if we add here the original color palette, which also somehow **has seven colors, where each color identifies the seven primary matter that make up our universe and the whole Material World**

consists of hybrids of these primary elements. Aren't there a lot of coincidences? Maybe N. V. Levashov was right when he claimed that **a person is a multi-layered structure with seven bodies and the physical body is only the tip of the iceberg, and its main part is invisible, because it is located in the frequency range of the "immaterial" world.** These bodies, which are not visible to the eye, **also have a material structure on other levels.** A good example is the Russian Matryoshka doll, where our physical body is in the center, and all this is a whole and unified organism. All cells of a multicellular organism create a balanced system - a single organism from a multitude of protozoan organisms-cells, in which all the functions of these protozoan organisms are coordinated with each other. They physically form an integral system - the physical body of a multicellular organism.

The living conditions of a multicellular organism are not only harmony between the physical, etheric, astral and mental bodies of each cell separately, but also harmony between the etheric, astral and mental bodies of all cells forming this multicellular organism.

Unfortunately, modern science and medicine in particular, does not want to recognize the integrity of the material and non-material world. Even philosophers still argue, "what is primary - matter or consciousness?". But here, in my opinion, lies the most important mistake. They cannot be divided, because the Body cannot live without a Soul or Essence, and the Soul cannot develop

without a Body (generator). If we do not understand and accept this foundation of Truth, we will lose not only our connection with the source of life, but also become even more mired in ignorance. Not knowing the elementary canons of nature, we begin to make irreparable mistakes, not only acquiring countless diseases, but also turning into unreasonable children with an inexhaustible thirst for consumption and destruction of all living things around us. We lose imaginative thinking, turning into mindless biorobots.

Here is one of the simplest and most illustrative examples of how doctors of medicine deceive us, taking advantage of our ignorance!

Most have given blood for tests, but no one could have imagined that an erythrocyte has a diameter of 7-9 microns, but more than 90% of human blood vessels have a diameter of about 1 micron

Question: how does the red blood cell get there?

Answer: there is no red blood cell in the blood, it is formed outside the Control System (or Brain) as a sedimentary structure with the loss of an octave of its state (when the octave decreases by 2 times, the total size increases by 1.284 times).

And there are many such examples.

Many people ask the question about the "SvetL" complex! Show me a **dark matter generator** that is installed on a tablet carrier. **What does it look like?** The answer to this

question was perfectly formulated by N. V. Levashov in his book **"The Heterogeneous Universe"**. Here are some excerpts from it.

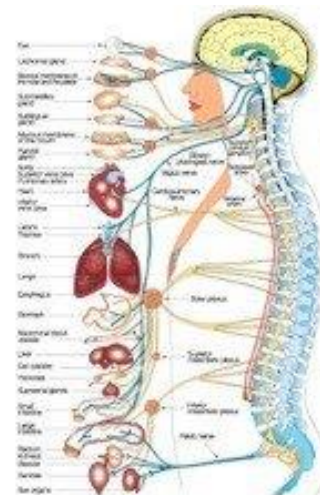

Man, as a living being, exists in the so-called intermediate world - between the macro- and microcosm. And in this intermediate world, man has to deal only with the manifestation of the laws of nature, and not with them directly.

Nature did not create the human senses so that he (man) could know nature. The human sensory organs, however, as well as the sensory organs of animals and plants, arose and developed as a mechanism of adaptation, and adaptation of each species of living beings to the ecological niches that they occupy. Man began to use his senses for the accumulation, preservation and transmission of information to his own kind. But this is information about the intermediate world, not about the macrocosm or microcosm.

Which, unfortunately, is ignored. Ah, in vain. Because having only five sense organs, even expanded with the help of instruments, it is simply impossible to describe and create a complete picture of the universe.

In order to create a full-fledged picture, it is necessary to be able to simultaneously observe both the surface and underwater parts of the "iceberg" of the universe, which is possible only with the appearance of additional sensory organs - to the five existing ones. However, this does not make a person think about the question - what can be obtained with the help of the five senses and what is needed for a full knowledge of nature. At the same time, one cannot be blamed for this, just as one cannot blame a person blind from birth for not being able to understand and feel the beauty and colors of the surrounding nature. The only way for a blind person to achieve this is to see clearly.

Therefore, using the five senses, it is impossible to see the "SvetL" dark matter generator. By the way! Dark matter is a scientific name, because science, with all its "modern" means, cannot see the Non-Inertial mass. Or the First Material. The names are different, as you can see for yourself, but the essence is the same.

Now a few lines about the "SvetL" WELLNESS PROGRAMS!

The operating principle of the "SvetL" generator is that it not only saturates a Person with the appropriate energy flows, but also restores the qualitative structure of the body's system to a healthy state.

The "SvetL" generator carries a software module functionally similar to a living organism with a fairly high level of artificial intelligence,

fundamentally different from those spoken about by today's scientists and modern science in general.

The "SvetL" generator automatically regulates the accumulated energy flows and distributes them in strict dependence on the current tasks of improving the body and maintaining such a state of the body for a long time (there can be an unlimited number of flows, both in quality and intensity).

Consistently working, the "SvetL" carries out the appropriate correction of the reticular formation and regulates control signals at a new qualitative level of the brain corresponding to a healthy organism and carries out changes at the level of cells, organs, tissues, body systems, as well as at the genetic level in accordance with the software modules embedded in it, independently creates a program for the creation of healthy cells and provides this process with its potential after the decay of the diseased cell. The carefully thought-out methodology and the precise process of implementing the "SvetL" programs in the future make relapse impossible.

"SvetL" programs successfully help the body to protect itself from the adverse effects of the changing environment and get rid of toxins that enter the body from the outside. Energy potential is an "accelerator" of the process of changing the structure of the area of the body to be healed, to a healthy state.

Now, what is the difference between the "SvetL" program of the Complexes and the Bracelets?

Many are tormented by doubts about which "SvetL" Bracelet to buy, **HEALTH, STRENGTH or REASON?**

F.D. Shkrudnev has already given an exhaustive answer to this question in the article "ANSWERS TO THE QUESTIONS OF PARTICIPANTS OF THE "SvetL" PROGRAMS! - (2) (December 2013)"

To his answer I can only add an excerpt from the "Slavic-Aryan Vedas":

As the Source of Life, it gives strength to all
to men, gods and plants.

What it reveals about the essence of each,

what gifts it bestows on life...
in the gods it reveals the hidden powers,

it endows people, according to their thoughts...

In my opinion, the most important thing in the "SvetL" programs **is that they produce and regulate the constant energy-informational saturation of your body, which manifests itself not only in the accelerated recovery of a Person, without the destructive effects of "drugs", but also maintains all the vital systems of your body at a reference level...**

I would like to finish this article with a wonderful saying expressed by Leonardo da Vinci.

"The acquisition of any knowledge is always useful for the mind, because it will be able to reject the useless and preserve the good. After all, you can neither love nor hate a single thing if you don't know it first."
