

## 2.12. Levashov's Genius and his LEGACY in the Transition Period. Part 1.

Author: Author: [Bitner E.A.](#)

### Part 1. BLOCKING INFLUENCE.

On 25 January, 2014, the First INTERACTIVE SCIENTIFIC CONFERENCE of the Scientific Research Institute TSUS (Center for Proactive Strategies) took place in Moscow. The main topic was:

**"How to give Russia the appearance of the future in the new World Order."**

<http://www.salvatoremm.ru/>

The contents of the conference can be found at the specified link, so there is no point in repeating in full what was said by the Director General of the Research Institute TSUS - B.V. Makov.

Let's focus only on the main key points that relate directly to the role of the "SvetL" Programs in the Transition Period.

Fans know that the date of the 53rd anniversary of the Birth of Nikolai Viktorovich LEVASHOV, the great Russian scientist, writer, artist and healer, is approaching.

Most likely, not many people know his Role as a direct participant, along with other Brilliant scientists, in the preparation of conditions and the transition from the interventional (parasitic) Control System of the Earth to the native Control System, which was created by our ancestors several hundred thousand years ago.

Paying tribute to his Genius and the Gift of foresight of events that we are witnessing, let us turn to his **LEGACY in the form of technologies that are known as "SvetL"**.

### **What were they created for?**

Their well-known purpose is "to help a person restore the integrity of an organism that has been fairly destroyed by environmental conditions, the intervention of pharmacology, excessive and unjustified vaccination, GM products, electromagnetic fields of the means of "civilization".

### **What other functions do these Programs perform?**

First of all, **the harmonization of the surrounding space**. The owners of the SvetL Complexes and Bracelets were convinced of this by their own experience, receiving clean structured water and food, free of toxic substances, for example, pesticides, residues of decomposition of products during long-term storage and stress hormones.

Almost every participant of the Program also noted how **the atmosphere of interaction between people in the field of operation of the device is changing**. And now, in order to **understand the foresight of N. Levashov and his genius** when laying programs in this technology, let's turn to one of their important points discussed at the conference:

"During the period of the change of "System power", changes in the energy-informational external support and a number of many other changes in the states of the surrounding reality, **the process of correcting people's states of consciousness, including the public**, takes place. The beginning of such a correction of consciousness in the overwhelming majority is **manifested through the so-called manifest "Rebellion of consciousness"**, which "passes through all communities of people" of the planet in a wave, manifesting itself to a greater or

lesser extent of the protest movement. Ultimately, **the transition of the potential state of the "Human Resource" into the most powerful "Protest potential" is most likely**, the destructive power of which is already being observed, but so far only in the countries of the Middle East, Ukraine, etc. But that's just for now. It should be remembered that a wounded animal, as a condition, **is disproportionately more dangerous, especially if IT is also the majority.**"

If we combine these two concepts (the harmonization of space and the "rebellion of consciousness"), we can see that the "SvetL" Programs can significantly neutralize the manifestations of aggression and attempts to harm both people and the Planet. In what way?

**N. Levashov's autobiographical novel "The Mirror of My Soul"**, again gives us a helping hand so that we remember how Nikolai Viktorovich blocked aggression.

**Consider a few quotes:**

"... On 25 February, the KGB was preparing a very serious provocation. People began to be intimidated by the expected irregularities through newspapers and television and were advised not to go anywhere at all on this day. I realized that the KGB was **preparing provocateurs** who were supposed to start a crowd and provoke it into riots with their actions and shots from weapons issued for these purposes, at the KGB building and other strategic facilities, and **thereby give the authorities the opportunity to introduce martial law in the country and begin repressions**. In principle, the success of this operation meant the seizure of power in the country by the top of the KGB. I decided to try to prevent bloodshed. For this purpose, **I created a kind of impact cap** for the entire Soviet Union. It's like in that joke about "Mueller's hat." So, I created my own "hood" with a program to **block any aggressiveness** and any manifestations of cruelty and violence, and ... on 25 February, everything went unusually smooth." ...

«...Up to this point, they did not try to eliminate me physically, especially purposefully, and especially the special services and special services are very serious! So, I only **ASSUMED** that the protection systems I created **COULD block** actions that were dangerous to my life, but... it's one thing to assume, another thing is to have confirmation of this statement!" ...

"... I blocked the actions of the people-performers, and none of them **EVEN MANAGED TO START COMPLETING THE TASK THEY RECEIVED!**"

Thinking over his technologies, Nikolai constantly improved **the very protection that the SvetL Complex generates:**

«...I don't have any "magic" protection that protects me by itself! In order for my protection to work, I have to create it every time for each specific case. And only after I managed **to solve another problem** related to another attempt to destroy me or Svetlana, I created another neutralization program, **taking into account all possible combinations of those already known to me.**"

Later, having understood where the "dog is buried" in this, **I learned to control my influence on such devices**. And if necessary, if someone was recording a conversation with me, **and I did not**

**want** what I said to reach those “ears” for which what was said was not intended, instead of the conversation on the recording there would only be “white noise”.

In addition to the impact on the devices, there was another kind of impact. Participants of N. Levashov's meetings with readers of his books should remember this. **More than once he said:**

"Very often I had to and have to speak in the presence of people who are at **different levels of understanding and development**, and therefore it was necessary to find a way out of the situation **so that everyone gets what they are ready for and even a little more, but not too much**. Strange as it may seem, **the search for new information** for a person, even very important and interesting for him, can cause its rejection, since an excessively large amount of new information **CANNOT** be perceived by the brain, and the **protective reaction of the brain is turned on - rejection!** And even if the volume of new information does not reach a critical level, the human brain in this case captures **ONLY** some part of this new information. And what part of the new information a particular person catches depends on his level of education, ability to think independently, on the presence or absence of analytical thinking, etc. Therefore, if you talk to each person individually, then there simply won't be enough time even for that. As a result of all the above, **I give new information to the maximum for everyone present, and each person learns the one he is ready for**, and at the same time I create such a program for receiving new information so that there is no overdose. So, overdoses are dangerous not only for drug addicts and alcoholics, but also when a person receives new information, otherwise the roof may "go" if the brain cannot disconnect from the flow of new information for him. And **provocateurs or just agents usually fall asleep peacefully**, and information is recorded only by those who need it for the good."

This small passage **contains a huge amount of information, but few have noticed it**. After all, in fact, **the process of BLOCKING unwanted actions** is described here.

**The maximum of new information** is not only words that convey the essence of messages. These are, first of all, flows of primary matter of a certain qualitative content. And this is a frequency set of necessary superpositions carrying a specific program.

Let's ask ourselves: ***under what circumstances do we start acting aggressively, get nervous, act rude, or simply feel dislike for this or that person?***

You probably already know the answer - **WHEN we do NOT have enough energy (potential)** to fully saturate the second material body of the Essence. That is, when the body of emotions is in an unstable state caused either by external factors, or narcotic substances, or by our ideas, type of thinking and social parasitic environment ("Essence and Mind", Volume 2, Chapter 9. The Nature of karma or the anatomy of sin).

How did Levashov manage to solve this problem? After all, she stood up to him constantly after he periodically held various seminars and schools that showed how mentally unstable a Human's condition **is in conditions created by social parasites:**

«...In the middle of 1991, I just held my first courses of lectures and was "sky high" with joy at **how eagerly and with what interest people absorbed what I could give them.** It's an incomparable feeling when you see how **people have light in their eyes, when life and meaning appear in dim eyes.** I have seen that **this is possible,** I have sought it from people myself and I know for sure that **it is possible.** Unfortunately, **for most people it is not yet possible to maintain this inner light by themselves, but it is possible in principle, and this is the most important thing.** My mistake was to think that after I managed to ignite this light in people's eyes, it would continue to burn on, without my help. But unfortunately, **most people are not able to maintain this light on their own, yet.**

Most people themselves are not able to resist everything that social parasites have already created on Midgard-Earth. And therefore, *the sparkles of light I lit in the eyes of people, **without constant nourishment from my side,** could not last long in such conditions,* but, nevertheless, there was a **trace** left in the majority, and **there was a willingness to fill the soul with light again.** When I conducted my classes, **I did not know all this,** I did not know that for most people it takes a lot of time to **fundamentally change their consciousness and ideas.** For some, it may take a lifetime for this to happen, because it is always more difficult to replace one foundation of consciousness with another, and it does not matter that the existing foundation is false! **For some, replacing one foundation with another may take several years,** but in any case, it will always take quite a long time for this to happen."

It was necessary to somehow maintain this **Light** in the souls of people! But how?

"SvetL" is the solution of a GENIUS!!!

To my great regret, I have never been able to attend the meetings of Nikolai Levashov with readers. But those who were THERE remember the extraordinary feeling of energy potential that Nikolai gave to all those present in the hall. Some received nourishment to clarify urgent issues, others - to improve their health, and others - to remove blockages. Well, those who came with bad intentions simply fell asleep, since the energy level they received gave pumping with primary matter of a higher dimension (according to Levashov) or octaves (according to Khatybov), which became an overload that included protection mechanisms - and the person simply fell asleep. After all, sleep is the removal of toxins formed during the overload of cells and body systems. **The benefit for them was undeniable - loosening the body.**

Summing up, we can draw an unambiguous conclusion: the POTENTIAL that creates a generator of "dark matter", or "psi-fields", translates a person's consciousness to a higher qualitative level

of dimensionality, which **removes the blockages** established by the interventional Control System and **does not allow aggression**.

At all times, the main thing in the use of violence was to obtain life potential. After the change of "System Power" and the "appearance" of "SvetL" technologies, such actions are **suppressed**, since they are **no longer controlled by the old System**:

"In the current critical period of the civilizational development of people, **as a result of their still automotor performance activity**, it is extremely important that the "History of the old everyday state" of the entire world community has ***ceased to be the reality of its controlled current and future incarnation***. There is no longer any future for such vicious civilizational development.

The fulfillment of certain current event processes and actions **at the local or international level in the life of the world community is nothing more than uncontrollable convulsive attempts to preserve their former predominant position of violence and social parasitism of some of its former ruling participants, as an insignificant minority**, in the collapsing constructive model of the vicious world order formed

by them, but already in conditions of the non-existing previous management program..."

"RNTO"
