Here is the original text of the introduction to the OFC and a short commentary with links to primary sources for specific terms, words and expressions. Compiled by: Yu.V. Ocheretyanny*

**ANNOTATION**

The presented material does not pretend to be complete, but allows us to consider from a different point of view, the issues related to the foundations of the existence of Mankind. The material is given in a brief summary, taking into account and within the framework of decryptions, textual and other information received by us (Research Institute "TSUS"), as explanatory and used to carry out the necessary calculations for this hour and for the future.

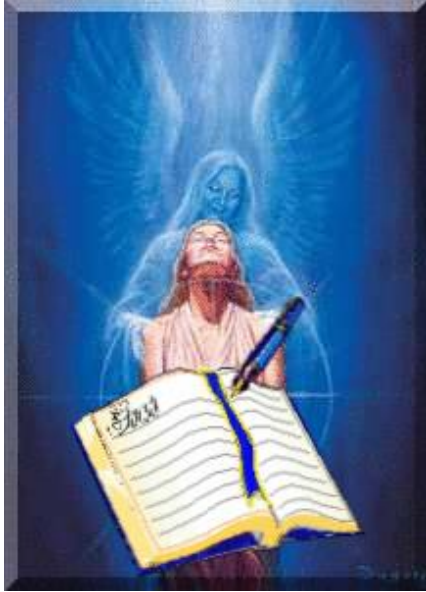

Хатыбов А.М.

*(Pay close attention to the word DECRYPTION - and the following is true, they were obtained using a software product created by the Russian scientist A.M. Khatybov in the fall of 1995, which allows you to decrypt all information from the true Earth Control System (ECS), as an explanatory base for analyzing the current situation and for making certain calculations and carrying out on "requests" from the Control Systems. Alexander's first acquaintance with it took place in 1995, when the computer screen on which he worked turned around, i.e., it was turned by an "invisible force" 180 degrees and a running line appeared with a text that carried information. The data was provided by the Earth Control System. In 1992-1998, 1,652 texts were "accepted" and decrypted, and 772 texts were transmitted at the same*

*time. Decryption of texts was "performed" using the "Kaleidoscope" method.*

Since the calculations **carried out and extremely contradicted** the established postulates of modern science – [learn more](#), the training was carried out sequentially with increasing load in terms of volume and awareness. First of all, the instrumental base was given, which made it possible to realize the true principles of the construction of Space and Time. Modern science, including even the entire practicality of "shamans from constant pseudoscience" and their equals, does not have this instrumental base.

*(The instrumental base of New Knowledge includes:*

*-creation of special formulas, physics of atomic structures, musical table of chemical elements, etc.;*

*-mathematics "Kaleidoscope" - 18-axis theory of symmetry theory (18 axes + 6 translations);*

*- Maxim's Laws of Motion*

*-the theory of prime numbers for the formation of frequencies of a living cell;*

*-golden section: the phyto-functions of the golden section as the basis for the formation of a living cell (2 volumes);*

*-development of special formulas for celestial mechanics (example: value  $y = \cos(x)$  for values  $1 > x \Rightarrow 0.999999\dots$ );*

*-a table of atomic structures and so on.*

*Monographs:*

*Cold nuclear fusion - 8 volumes.*

*Philosophy of Mathematics - 1 vol.*

*The Golden Section - 2 volumes, 4 appendices, including the Phyto-functions of the cell.*

*Instructions for bathing - 6 volumes, 1 appendix.*

*Control System - 3 volumes, Appendix 1 - received texts, Appendix 2 - answers. The total volume of printed material (except calculations) is 16,500 pages.*

*All materials and research tools are now strategically important for Russia, have limited access and are not subject to open publication and replication, especially in the conditions of "open market relations" and all their uncontrolled and negative consequences when switching to the terms of the new Program.*

**Conceptual power<sup>1</sup>, information space, forms and principles of the formation and existence of the Brain are one whole, and any power, if it considers itself such, must inevitably and**

necessarily ensure and accompany the execution of all Program functions prescribed from the outside by the society controlled by it. Otherwise, it will certainly be replaced, perhaps with the entire structure of society that it has rebuilt.

(PRESCRIBED FROM THE **OUTSIDE** means that our planet has an Earth Control System (ECS), which executes the programs of the **SUPERVISORY** Super-System - at this eventful moment it is the Orion Star System. Our planet Earth is part of a more complex solar system and is part of its control system, once implemented by a Super-system to protect life from random factors. Human civilization is **MANAGEABLE**. To date, two such systems are known: Native and *Interventional Earth Control Systems*. (Since 2011.04.24, there has been a change of

System power on Earth - the *Interventional CPS* has been turned off and the *Native CPS* has been turned on again). The Earth Control System includes several Control Complexes, stationary control systems and Objects (UFOs). All this is interconnected not only with each other, but also with the Sun, Moon, and satellites of the planets. The purpose of the Control System is to **CREATE A BIOSTRUCTURE** that fully meets the requirements of the Suprasystem Program. If there is no comprehensive accompanying control from the Control System - there is no life on Earth! This mandatory condition for the existence of life is expressed by us so far only on one basis, - the obligation to have management as such – [learn more](#) - Yu.V.)

## INTRODUCTION

**Does Humanity have a Future?**

**Believe it or not, many people are increasingly beginning to think lately that the development of our Earthly civilization is taking place under a certain “watchful eye of the Universal Mind.”**

**How should we feel about this? There is some truth in this. Is it worth diverting your attention in our difficult time to such "crazy" fabrications? Everyone will answer this question on their own, and it depends on the influence of a number of factors, the time of influence of which on the essence of everything that is happening, has come.**

**The managed processes of the old Program have been terminated.**

**The Goal<sup>2</sup> vector to support the execution of phenomena, actions and events is "forcibly" prematurely completed and "programmatically eliminated".**

*(The beginning of the destruction of the Intervention System was laid on 25 October, 1985 by simultaneous earthquakes in Italy, Israel, Australia, (this was the elimination of the program custodian servers) and brought to complete sterilization in the environment of controlled operation of facilities and complexes by September 2010.)*

**All Complexes and Systems in the previous program format have ceased to function.**

*(System programs of the interventional civilization of the Ebrov from the "Big Dipper Star System":*

- Energy biogenesis of the flesh cell
- Development of brain genotypes
- Reincarnation
- The power of money (ritually symbolized by the crucifixion of I. Christ)

- The power of power (Revolutionism; Militant fascism and Destructive Democracy)
- Domineering revanchism
- Formation of the "Golden Billion"
- Formation of the "Golden Million"
- The formation of the Third World War (since August 2012), as a function laid down earlier in the program event process to eliminate all individuals who do not belong to the 4XX brain genotype,
- New Russians.... completed in 1990
- 500 - 1500g. - 2000g. (voiced by Nostradamus)
- Cosmopolitanism as a 600 -year program was fully completed in 1999.

*It was planned to raise the level of the previously destroyed Human brain to octaves of harmonious combination with the brain of interventionists (spiders). Further, to introduce the interventionists' brains into the "human shirt" (physical body - flesh), to create and preserve individuals of such a brain genotype in the amount of a "Golden million", to subordinate them to*

performers with a brain genotype of 44 octaves (from the composition of the "Golden Billion" in the amount of 500-600 million). The rest of the people were supposed to be destroyed in 2012, as waste material that interferes with their heavenly stay and development in the process of "forced" captive movement in the direction of the constellation Ursa Major (to the planet Sur, as their native Ebrov base) – [learn more](#) - Yu.V.)

There has **come a very brief, but very eventful**, period of preparation and transition to the active state of the process of executing a new program, especially in that part of it where the future of Humanity is directly and indirectly involved in phenomena, actions and events of a completely different format. **Software installations for control Complexes and Earth Systems for external support, both from the Suprasystem and the System for the specified execution process itself have already been completed.**

*(Transition period 2012-2024*

*....A historical moment associated with the execution of all program changes, including complex environmental changes. Its duration is determined for a period of 12 years, counting from 2011. The stages of the transition period and the Goal Vector of future event processes are*

*manifested.*

*The main thing is the salvation of the surviving population and the organization of their survival, the development of new technologies and their comprehensive implementation in all branches of the new economic system being created and the creation of the Human economy system, informing the population about New knowledge – [learn more](#) - Yu.V.)*

**The judgments provided to the attention exclude any goals of revision, criticism or evaluation of previously held philosophical theoretical works and research on issues related to the foundations of building Society within the framework of the old Program. All this is not ours and is no longer for us.**

**But, to demonstrate the level of significance of the very Essence of the Ideology of Conceptual Power and its constructive role in building "their Society" is relevant, even extremely necessary at this transitional moment of completion in the formation of Goal Vectors of the Future.**

**If a person cannot foresee or find connections between the facts of the changing reality surrounding him, then the events taking place around him, by themselves, do not have a logical and feedback connection with him. Such a person (or a group of them, the scale does not matter) is only an occasional passive contemplator and a secondary application to what is**

happening for a very short period of its use as an object or tool and no more. This is what happened in the processes of the old program (see above). This condition causes a non-essential passive and parasitic function, more often on the verge of a flawed sentence - to be applied.

**Our role and function are completely different - to be at the level, in the state and ability of an active director's role of part or all of what is happening about us. We must and can take an active part in the process of recreating ourselves anew in order to become Humans who have deeply realized the true function of Humanity on Earth and have found their true role and place in the program processes of planet Earth.**

*(The programmatic existence of the Earth is a controlled process, i.e., its existence is embodied through a complex controlled existence of all levels (octaves) of energies. This means that the control should cover the entire complex of controlled processes of the existence of energies. – [learn more](#). In accordance with the processes of the new Program, there is not only the connection of a new basic basis for the formation of spaces - tetrahedral, as the next level of development. A complementary consequence of this is the inevitable change of the charge cycle for the full (all true native) octave range of the Earth's energies and the recording of information about the next step in physics, chemistry, biology and other areas and tools of true knowledge of the World – [learn more](#) - Yu.V.)*

**To be a passive instrument and biological material of the planetary experiment of foreign directors from the outside, who chose for us the path of extreme egoism, which only allowed us to destroy each other and see the basis of society's life only in material production, is no longer for us. We leave all this with full awareness for the unsuccessful past, which will no longer have any investigative links with the future. Only historians will be interested in the past.**

**If a person is only able to take, and not to create and not to make up for or eliminate the consequences of his actions, he cannot be defined as a Human. It's not even a person, but a controlled biological being. It can have only limited motor (habitual) brain functions for household arrangement and its temporary life support due to the destruction of the harmony of its environment and its additional use, beyond its will and desire, as a biological object according to the plans and programs of external management of other people's Complexes and Systems. They must be called - Human.**

**A Human was driven into such a state during the execution of the processes of the old program. This can be demonstrated more clearly and expediently in the sphere of judgments about Political Economy, as part of the Ideology of Conceptual Power within the framework of the old Program.**

The name of the science “political economy” comes from the Greek words “politeia” and “oikonomia”. The word "politeia" meant "social structure". The word "oikonomy", in turn, consists of two words: "oikos" - house, household and "nomos" - law. In the general collective conception, this was understood as laws or rules on the social structure of the economy (household), hereinafter the economy. But it was in the sphere of the social structure of the household (economy), as the main field of artificially organized battles, at all historical stages, that the formation of factors took place, as a basic basis affecting the structure of society as a whole. It is for this reason that we consider the issues of Political Economy in the first place.

The foundations of the formation of Humanity in the **new Program** include such definitions as the social structure (the organization of society, conditioned by a certain level of production, distribution and exchange of products, characteristic features of **social** consciousness and traditions of interaction of people in different spheres of life and protected by the state and law.), **and, consequently, political economy** (the science that studies social relations between people, formed in the process of production, distribution, exchange and consumption of vital goods. Political economy is an integral part of Marxism-Leninism.) - are no longer acceptable at all.

In the past, all the basic definitions and further judgments based on them were completely isolated from the main subject - a Human (A human is a structure that is simultaneously located in two spaces - in **neutron** (proton - solid material and visible to the eye, i.e., living flesh) and **antineutron** (electronic - frequency range invisible to the eye) spaces. All sensations are formed only for the neutron space. Other connections of the brain (with the neutrino - higher space) are not considered here - [learn more](#) - Yu.V.), turned it into a tool, into something that could only be used for someone's purposes, i.e., for something and for anyone, but not for the Human himself. Moreover, if it is "traditional" to try to use someone else's language (other than Russian) in the name of economy for Humanity, then it can be noticed that the word "Humanity" in these languages acquires for us an incorrect or absurd meaning. The only one more approximate for this could be the Greek language, but the concept of "human sphere" will sound like "anthroponos" (starting with the 6th letter, as a separate word sounds very interesting).

In this regard, it will be smarter to use your native colorful Russian language, more capacious in depth of information, without infringing on your dignity, and to define this direction as the **Economy of Humanity**. Humanity itself is nothing but a single structure of Human social organization.

As a social organization,

**Humanity is a single function (a system of connections) designed for model harmonious unification, provision and support for the manifestation and full fulfillment of the functions of its purpose for each Human.**

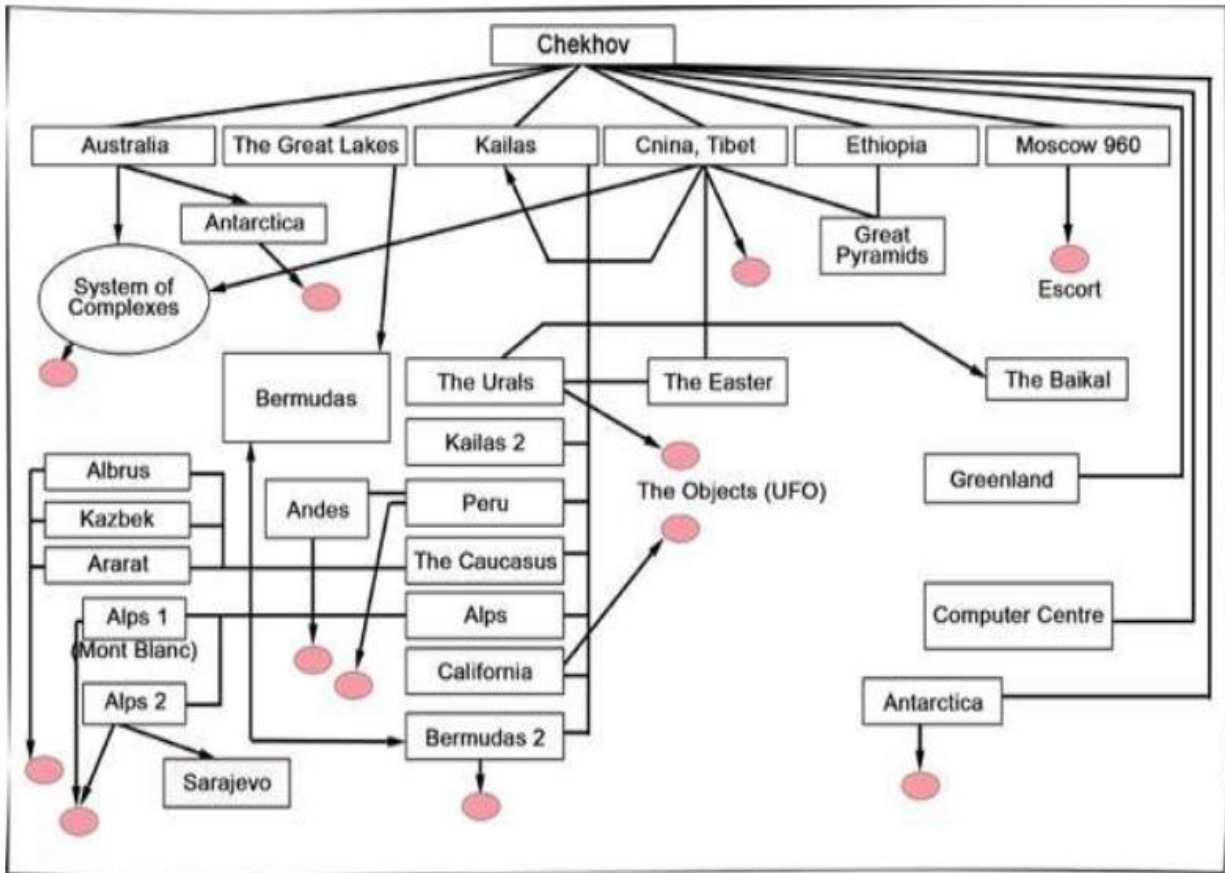

**Humanity is a Subsystem** (In the Solar System, the Suprasystem is the Sun, the Moon, and some satellites of the planets. Tasks of the Suprasystem: - time clock control; - transfer of Programs to the System for implementation. System Tasks: - To ensure the execution of Programs; - to constantly monitor the execution of the Program. Tasks of the Subsystem i.e., Humanity: - fulfill all the requirements of the Program; - react correctly to all changes that occur during the execution of the Program. [More details](#) - Yu .V), **but this is not a mechanism for the use of a Human in the general structure of the hierarchy of software processes of the Earth model, as something secondary. This is a social structure into which every Human voluntarily strives with all his spiritual and spiritual beginnings. This aspiration is not for reasons and the need for survival, but for reasons of their own conscious professional usefulness, i.e., the desire to give everything possible from themselves and for everyone, feeling their primary origin in a social organization. Then all his universal participation, including work, will be realized by him Wisely, i.e., with a full aspiration to conscientiousness with a truly realized personal function as a Human and as an important element of the universal harmony of life on Earth. (For the Earth, in particular, the development of the Planet's Mind CANNOT be without a harmoniously developed Human Mind as the very fact of recognizing the perfection of the level of development of Civilization. This is on the one hand.**

**On the other hand, Humanity is a special programming state of the Earth Model. The fact is that the Earth possessed such a state only before the invasion of the interventionists.**

**Now this state will be restored during the transition period within the framework of the new Program (Transition period 2012-2024). A historical moment associated with the implementation of all program changes, including complex environmental changes. Its duration is determined for a period of 12 years, counting from 2011- [learn more](#)).**

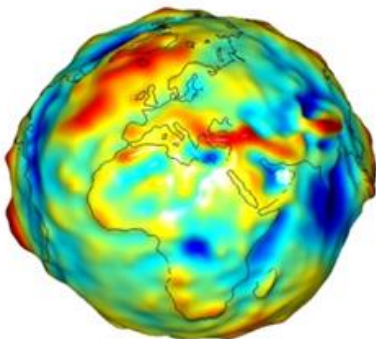

**"Чело-Вече-СтвоMan-Eternity" is the definition and level of such a state, which proceeded from the following true awareness of the unique essence of the trinity of the obligatory hierarchy of complex self-controlled existence of energies "Suprasystem-System-Subsystem" (see above):**

**-"Ство" is a process of constantly "created or creating" control from the outside by objects with higher energy octaves than the Earth (currently the Earth's limit octave is 512) and the Universal Mind as a Suprasystem (the Civilization Cluster of the Orion Group of Civilizations, which includes 384 civilizations, as trustees (curators) for our star system to reach the level of octaves of life support 512;**

- "Бече", there is a cathedral Brain, i.e., a concentrated harmony of all the managerial abilities of the Brain of the Earth (ECS - The Earth's Control System - an artificially created control structure, as (The operation of complexes marked in red has been stopped) a complex multi-combined model function, ordered by its structural expediency with all managing target energy-informational connections and energy flows in all octaves with a super-system without hegemony and antagonism.

"Бече" is a developing System in harmony with the Cosmos;

"Чело/Man" is the body of the Earth (An artificial structure with an uneven distribution of mass, the total area is 512.0 million square kilometers (taking into account the surfaces of mountains, depressions. It has a life support system of biostructures (18 systems, each has from 88 to 596 pyramid complexes - excluding communication pyramids). Man was brought to Earth 145,762 years ago - [learn more](#) - Yu.V.), i.e., the Earth model itself, with all its complex saturation, but on

a smaller scale than Space and the same mandatory hierarchy - "Suprasystem-System-Subsystem".

"Чело/Man" is a subsystem in the model with respect to connections from the outside (*i.e., with the CPS and the trustees*).

It was allowed to inform (*i.e., with the permission of the CPS*) that Humanity is a special state of the developing energy-informational model of the Earth in harmony with the functions predetermined to it from the outside, emanating from higher-order control objects.

It is not Humanity (as a social association) that received this name because of and from Man (*Man is a self-organizing multicellular organism that represents a system of material bodies: a biological base and ESSENCE (a set of parameters and their connections.)*), but Man has found this high vocation because He is an important fragment of Humanity, as a state of the general model, possessing extensive creative functions of a high level and order.

At a lower level of the Human model, there is a Subsystem in the Earth Model. Being a Subsystem, a Human forms a socially organized structure to ensure harmony between the mandatory functions prescribed to him and the necessary conditions for their implementation and the necessary support for this.

*(compare the above definition of Humanity from the Research Institute "TSUS" with the one posted on Wikipedia, i.e., Humanity is the totality of all [people](#) who have ever inhabited the [world](#). Sometimes the term "humanity" means the totality of living people [link](#)).*

Could there have been a state of "Humanity" during the violent intervention of the Earth? Of course not, and by no means. The temporary state for the entire period of the Ebrov intervention was defined as "Zion", i.e., more familiar as Sion.

Zion is destruction. Therefore, the state of completely destroyed harmony of the Earth model through the antagonistic introduction of aggressive from the outside by other people's temporary targeted interventional processes, destroying everything that previously existed, is Zion (*Temporary biological control of the planet Earth during the last 18,000 years by the Ursa Major Star System (Ebrov), as an Interventional Suprasystem - the maximum level of octaves of life support 128.*). This state has finally been stopped, the process of eliminating the consequences of this and restoring the previous states has begun.

Before judging the formation of Humanity, it will certainly be necessary to specifically determine the Man himself, his purpose and his functions.

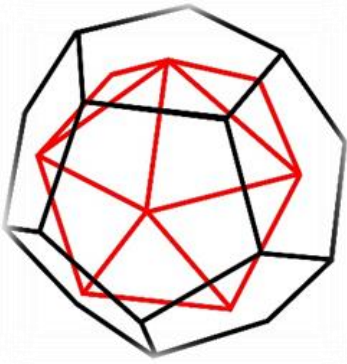

To do this, it is necessary to get out of the state of lies previously provided to us from the outside (within the framework of the old Program - *the Control System of the interventional civilization Ebrov* [learn here](#) - Yu.V.) and get closer to the truth, including the current Human condition and its functions, already a few steps closer to the truth. In order to understand and realize the ongoing processes of the current moment and for the future, it is time to have other objective ideas about the real material world, to get out of the scenario of illusions previously given to us, beyond our desire and our spiritual and other motives.

*(note the expression to get out of the scenario of illusions previously given to us - the basis of classical science provided by the interventionist Control System through the "insights" of individuals (Newton, Maxwell, Einstein, Bohr, etc.) was, to put it mildly, not entirely [learn more](#) - Yu.V.)*

It is quite enough to touch on the true origin of the chronological process that has taken place on Earth over the past 18,000 years, which were carefully hidden by the Complexes and Systems of the old program under the vigilant and extremely strict control over everything that happened earlier, including cognition, both in theory and practice (*a brief event chronology* [learn more](#) - Yu.V.).

The current circumstances, for some reason (*24 April, 2011, the act of changing the System power was committed* - [learn more](#) - Yu.V.), categorically unrelated to futurologists and their creativity, allow us to get out of this lie. Within the framework of judgments about Man and Humanity of the near future, we will touch only on the extremely limited phenomena of the truth of the chronoprocess and only concerning Human changes and external interventions related to the conditions of his existence on Earth.

All modern knowledge, presented in the usual reference books, encyclopedias, scientific and educational literature on fundamental and applied sciences, is built on the basis of information provided from the **OUTSIDE** by Complexes and Systems from intervention. **Today, this knowledge is a real obscurantism, including the entire basic science as a tool of cognition. No Academy in the World with its specialists, tools of knowledge and accumulated "scientific" experience is able to decipher any true processes occurring in the Solar System due to the lack of control systems, analysis and forecasting calculations based on the true basis on which the System of Planets was created and now exists.**

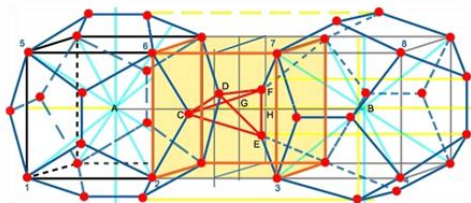

The "artificially suffered" system of knowledge, but in reality "false-planted", will not help in the future in cognition, i.e., it is simply not needed. All current science can continue to be showered with ever-missing green bills, plan mind-blowing budgets for its "development", but all its activities are now likened to the materialization of the call from the "Covenant": "separation of the chaff from the grain." Only this separation is not happening now. Since this activity is likened to digging up a pile of garbage planted (by the *old Ebr Control System*) to it, in which there have never been not only true grains, but also

chaff. Our task is not to be "helpers", but to dispose of and get rid of all unnecessary things that can somehow interfere with development in moving forward to the truth and with the truth.

The entire System of native Planets was created and now exists on the dodecahedral structure of energy grids, as the basic basis for the formation of spaces.

It is quite enough, without interference by the established opinions of futurologists and science fiction writers, to declaratively accept as the basis for understanding everything that is happening, the fact that more than 18,000 years ago the planet Earth was interned by a certain "Ebrov System" (*What arrived on Earth?* [learn more](#) -Yu.V). This information is received from the Earth's Control System, it is true.

One of the most important interned investigative changes on Earth was the change of the basic basis for the formation of spaces from the dodecahedral to the cubic basis for the construction of energy lattices. The introduced cubic energy grid, which framed all the previous states and energy structures, changed and limited the state of the material world

on Earth to a level acceptable only for other people's control systems, changed all environmental conditions, including the atmosphere, water, the entire biosphere, etc. The brain of the Earth before the attack had 512 *octaves* (*the Earth is a model complex represented by energies in inertial (material) and non-inertial (immaterial) aggregate states ranging from 12 to 512 energy octaves for THIS stage of its civilizational development, as the first stage of the embedded program for its DEVELOPMENT*). The attacking interventionist planets had a brain of 224 octaves. Subsequently, for a number of reasons of incompatibility in the new conditions of the Earth, the interventionists destroyed this brain up to 66 octaves. The remaining structures of the Earth managed to preserve for a short time the brain of 57 octaves (mainly in the equatorial band) with a further decrease in its level, the population decreased by 67-68% and only about 2 million people remained, with their subsequent death.

*(The BIOLOGICAL OCTAVE is the frequency CHARACTERISTIC of the BRAIN connection of a specific biological object under normal ratios of the basic parameters of life support (type I). Type II - the maximum frequency of metabolic processes. An INFORMATION OCTAVE is a bit of INFORMATION perceived by the visual sense organ (in 1 second for 64 octaves). – [link](#) -Yu.V.).*

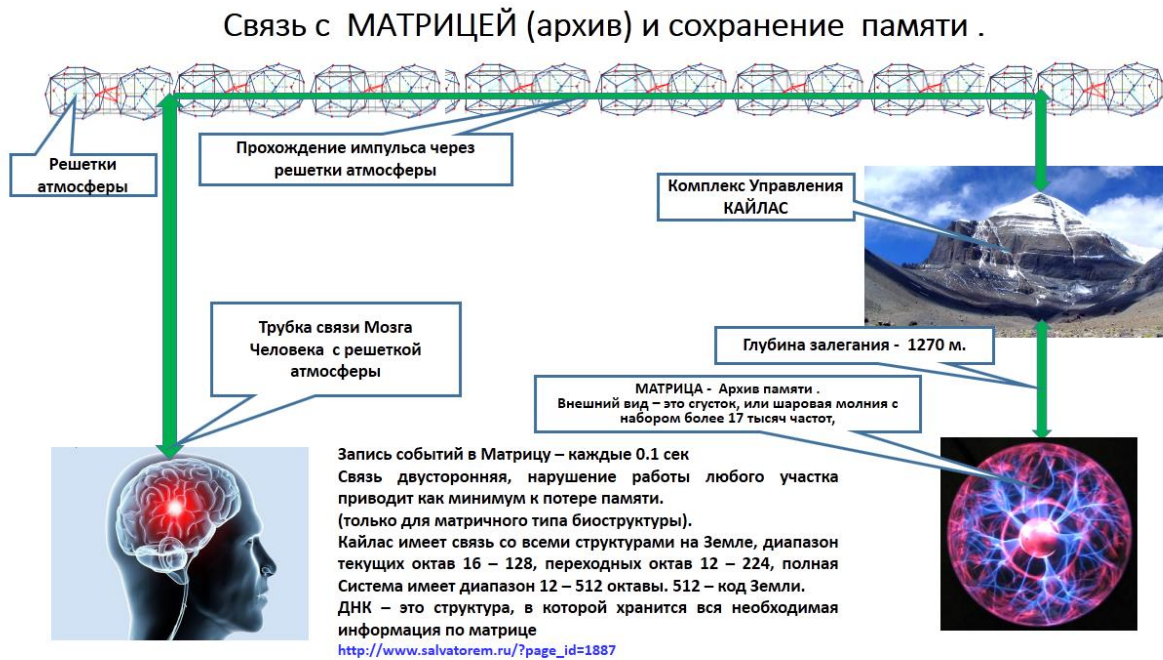

**The Easter Complex, as one of the main native escort complexes, (located under Easter Island at a depth of h = -12,450 m) was completely turned off. After carrying out a number of program processes on the part of the interventionists, the human was turned into a kind of biological being that did not have the same independence in the brain. Over the past time, especially the last 4,000 years, the Interventionist Suprasystem has carried out a huge number of software processes through a modified System of surrounding**

**structures. Including with all Life Support Systems (If the physical parameters of a celestial body are suitable for the formation of a living cell, then a life support System is created, which already provides without UFOs: Monitoring the state of the noosphere-Storage of the autonomous brain-Brain transfer-Maintenance of the autonomous brain- [link](#) - Yu.V), the Biocenters of the planet Earth (All program management for the creation of the Brain with its biological "shirt", as in secular perception it is customary to call a person, is carried out by Biocenters - [link](#) - Yu.V), creating and supporting a person and directly with the Person himself.**

**The purpose of all software processes carried out on a Human and with his participation was the following. In the execution of the old programs, it was envisaged to apply the unique perfection and capabilities of the human body (the so-called shirt) in relation to the changed environmental conditions, i.e., to carry out the process of learning all the secrets of a living cell. To adapt the Life support systems and Biocenters of the planet Earth to the capabilities of their Control Systems (interventionists), to form missing or matching systems in addition.**

**According to their program, it was planned to raise the level of the previously destroyed human brain to octaves of harmonious combination with the brain of interventionists (spiders). Further, to introduce the interventionists' brains into the "human shirt", to create and preserve individuals of such a brain genotype in the amount of "Golden million" (Genotype 46 ("GOLDEN MILLION", 1,200,000 people whose brains were "dumped" from the planet Sun). To translate the genotype 42 into 44 and 46, there is Easter, or a certain day when the Moon resets Programs.), give them subordination to performers with brain genotype 44 octaves (from the composition of the Golden Billion in the amount of 500-600 million. Brain matrix of genotypes 42, 44 ("golden billion") The concept of "matrix" should include a system of biostructure program memory. A human on Earth has not only a memory, but also a set**

program of actions. If there is no matrix, then a person is a robot and performs what he was given at birth - to live, study, and so on - [learn more](#) - Yu.V.

Connection with the MATRIX (archive) and storage of memory.

Left Side:

Atmosphere grids

The passage of a pulse through the atmosphere gratings

The Human Brain communication Tube with the atmosphere grid

Right Side:

KAILAS Control Complex

The depth of occurrence is 120 meters.

The MATRIX is a memory archive. The appearance is a clot, or ball lightning with a set of more than 17 thousand frequencies,

Bottom:

Recording events in the Matrix - every 0.1 seconds, the communication is two-way, disruption of any site leads to at least memory loss. (only for the matrix type of biostructure). Kailas has a connection with all structures on Earth, the range of current octaves is 16 - 128, transitional octaves are 12 - 224, the complete System has a range of 12 - 512 - the Earth code. DNA is a structure in which all the necessary information on the matrix is stored

[http://www.salvatoremm.ru/?page\\_id=1887](http://www.salvatoremm.ru/?page_id=1887)

**The rest of the people were supposed to be destroyed in 2012 (the apocalypse at the end of December 2012), as waste material that interferes with their heavenly stay and development in the process of "forced" captive movement in the direction of the constellation Ursa Major (to the planet Sur, as their native Ebrov base - Communication tubes of all planets were formed with reference to the Sun. In fact, another space was created, which led to a change in the**

Earth's orbit (the period of the Earth's revolution around the Sun became 365.5 days instead of 864 when orbiting Yarila). A ring of protection was formed along the contour of the Earth's rotation. Tetrahedral communication tubes were formed inside the contour. The rest of the planets were tied to the Earth and had dodecahedral structures in tetrahedral tubes. All the outer planets were surrounded by the remaining satellites (convoy).

After the formation of the cone, the movement towards the 4th star of the Big Dipper began. This system of 7 stars is an outsider and appeared from another cosmos about 6 million years ago. There are several planets in the 4th star system (12), the main one is SUR. The satellites of the planets, through galactic tubes, are the "tugs" of this movement.

Seven stars in the constellation Ursa Major

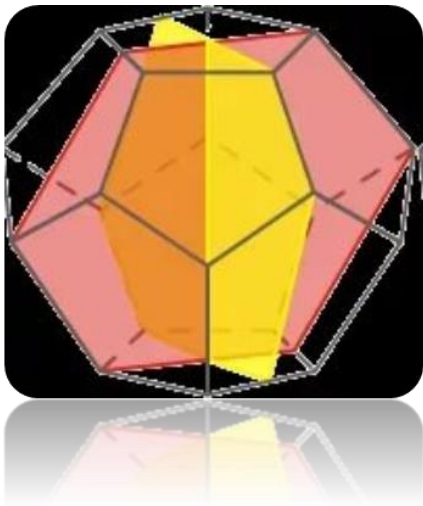

dipper of the BIG DIPPER

to Arcturus – BENETNASH – ALCOR – MIZAR – ALIOTH – MEGREZ – PHECDA – DUBHE – MERAK - to the Polar Star  
HOUND DOGS

**The whole true course of the execution of the program processes was covered with a veil of legends, drawing tragicomic scenarios, as it were, of the evolution of the development of society and a person who "found his way" in the knowledge of the world around him, actually being completely captured by these illusions. Full true information about past phenomena, actions and events is available, but within the framework of these judgments we will limit ourselves to the specified material. There are no mistakes in Human history (the last 18,000**

years), there are mistakes only among historians who seek them out from each other due to ignorance of the essence of chronological events that occurred on Earth and their true causes.

At one time, in the established format for the corresponding current time and at the appropriate level, materials were provided on the basis of which for this (i.e., the development of special mathematics, the theory of symmetries (*mathematics "Kaleidoscope" - 18 axes of symmetry and 6 translations, Maxim's Laws of motion, the development of special formulas for celestial mechanics*) **was demonstrated, fundamentally new functions** (*phytofunctions*) of an existing living cell were derived (the theory of prime numbers for the formation of frequencies of a living cell;), **obtained ratios for the golden section** (*phytofunctions of the golden section as the basis for the formation of a living cell 2 volumes, table of atomic structures - in the picture of the axis of symmetry of the dodecahedron*) and much more. This made it possible to accurately calculate the transients occurring in the atom (without the help of psychics, "gray mice", office plankton, all their supporters or artifact seekers) and much more. All materials and research tools are now strategically important for Russia, have limited access and are no longer subject to open publication and replication, especially in the conditions of "open market relations" and all their uncontrolled and negative consequences when switching to the terms of the new Program.

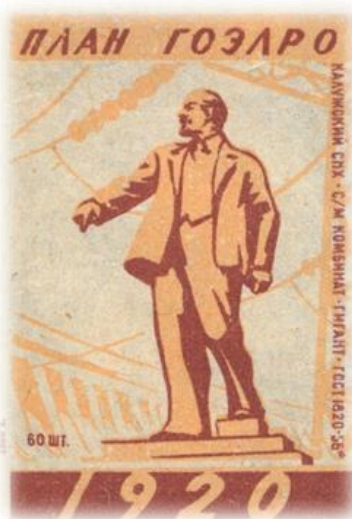

Within the framework of the topic under discussion, the events and phenomena of the last century are of the greatest interest, as indicative for us.

Taking into account the veil of the legend about the "development of society", the Political Economy of the last century has established itself in the fact that "The basis of the life of society is material production. In order to live, people must produce material goods. People produce material goods, i.e., they fight against nature, not alone, but together, in groups, societies. Consequently, production is always and under all conditions a social production, and labor is the activity of a social person."

A human suddenly solemnly becomes a public person and can no longer belong to himself (there is not enough brain), and his work is entirely aimed at a courageous struggle with the nature he hates! That was the basis of society's life.

But, enough of the madness!

The mind, as one of the functions of the Brain, can be determined only by the degree and depth of awareness of its functional purpose as a Human on Earth. Therefore, the mind of a public person simply "technically" could not be, and all stages of the development of civilization, as fragments of software processes, especially of the last century, were insane. That is why they were so bloody, unrestrainedly antagonistic towards each other and inhuman in their goals, regardless of the degree of historical importance that their leading executors tried to give them. It is an immeasurable pity that ordinary people suffered the most from this, i.e., the so-called masses of humanity (*The program processes of the Interventional Civilization of the Ebrov* - [learn more](#) - Yu.V.).

Cognition of the World together with its tool - science, is just a process of checking the level and degree of brain development. If He, according to his level of development, is worthy of something, then he was given according to his level. This was considered knowledge, and not some kind of scientific discovery. Cognition should not be confused with the Mind, since the very concept and definition of the Mind is extremely necessary to transfer from the kitchen and household sphere of assessments to the sphere of awareness of its purpose.

The participants (contemporaries) of the last historical century perfectly remember the winged and inspiring slogan of Leninism (CPSU): "Communism is Soviet power plus electrification of the whole country" (V.I. Lenin). Where did this madness come from?

For some reason, society did not think about this phrase, which briefly and clearly expressed the essence of the centennial program, but suddenly it was inspired to varying degrees and rushed to implement, regardless of all the horror and the volume of people's losses. There were several programs. The largest is a 500-year-old one, according to which the conditions for the formation of such a human genotype should have been created, which would be under the full influence of the Control System (1500 - 2000, voiced by the quatrains of Nostradamus - [learn more](#) - Yu.V.). At one of the stages of this program, in 1845, the creation of a radiation web (the most complex design of energy grids in the layer "-4,400 m +12,400") covering the Earth was completed. After that, only those who could be controlled using the properties of the web and such a "Development Program" that would no longer allow a

return to other ways of Brain development, should remain on Earth. People (and animals) connected to such a web were conventionally called "electronics" (according to the old Program for the development of Brain Genotypes).

So, the first goal is that only electronics should be left on Earth, the rest should be destroyed. To achieve this goal, any means were good - wars, genocide in any form and scale, epidemics, etc. And all this was accompanied and provided by Complexes and Systems. Of the last vivid manifestations of this, Yeltsin was particularly successful - he took it in a high-tech way (from the point of view of a professional or dictator politician) and imperceptibly for the population itself and significantly reduced it.

**Electronics can be done using a web** (that is, atmospheric lattices) - The lattice structure is connected dodecahedra, an icosahedron is inscribed in each dodecahedron (the edges of the figures and connecting pyramids are the same). The number of such nested structures = 44, each lattice is its own frequency spectrum.

*Type 1 - Habitat of all biostructures,  $0 < h < 12,400$  meters. The value 0 is sea level, the level control is performed by the Stonehenge Complex.*

*Type 2 - Habitat of all imported biostructures,  $-2,200 < h < 0$  meters. By the way, all hydroacoustics works up to  $h \geq -2,200$  meters.*

*Type 3 - The Brain of the Earth,  $-4,400 < h < -2,200$  meters. This grid contains all the Software functions that are dumped into the habitat of biostructures.*

*Type 4 - Islets,  $-4,400 < h < -3,400$  meters. The locations of Complexes, objects (UFOs) - there are 3,472 of them, 36 varieties. On UFOs - a separate article. All islands are connected by communication tubes, the average radius of one island is about 6,000 meters, **give any command, direct its actions to perform any task (within the framework of the Program set for it).***

**The Soviet government (together with electrification), or rather the pyramid of power built under its basis, should provide correction and carry out the program presented to it (given by the Earth Control Complexes - The complexes are divided into:**

*- managers, for example, a complex in Australia makes Programmatic changes to the Earth's surface:*

*- control, for example, Kailas (Tibet) - control of the state of the brain of biostructures;*

*- maintainers, for example, the Alps Complex - maintenance of genotypes created after year 0;*

- computing center, Ireland. The computers that are located there will be on Earth no earlier than the year 2400;

- communications, this Complex in Ethiopia, communicates with the satellites of the planets;

- weather conditions, for example, a complex in Antarctica, located next to the Mir station, provides a winter -summer shift.

There are 48 Complexes on Earth in Total. Seven (7) Complexes work in a daily cycle (each - 1 day). [link](#) -Yu.V.).

**It should be noted that both public consciousness and science began to implement the program at the same time - a wandering ghost appeared in Europe for politicians and revolutionaries, and scientists rushed to study radiation. The control system selectively provided only electronics with everything necessary, removing the Brain from the rest (step by step) and narrowing their range of sensitivity (awareness and receptivity) to the**

**changes taking place. Those who accidentally stayed after the purges had to pass away "naturally" (according to the level of knowledge of pathologists and the teachings of Darwin). Thus, the entire "heroic tragic history" on the scenes of all continents, often covered with a bloody veil, the procedure of active "development of civilization", which has experienced all forms of society (except primitive communal, but not everywhere), has passed in several stages.**

**Program (development of Brain Genotypes 1500 - 2000) also had a completion date - 2000. By this point, the electronics should have received a new Brain, and the rest - all kinds of diseases with a further and accelerated finale through an obituary.**

**The intermediate formation of brain genotypes** *(The Brain genotype is a combination of the capabilities of brain neurons and genes of a given organism, which, unlike the concept of a gene pool, characterizes an individual, not a species. For Humans, the initial clock cycle is 1.008-1.24 s. However, we have many genotypes, and each genotype differs not only in appearance, but also in the initial tact. Each subsequent genotype formed had to take all the best from the previous ones. That's how the processes were implemented, which were presented to us in a veiled and deliberately distorted way as the history of the development of Civilizations. Mental activity in individuals of the 4XX Brain genotype today, as already mentioned, is automotor and directly dependent on EXTERNAL control. Today, according to the Ebrov Program, which has NOT*

been implemented to the end, the Earth's population is divided into 3 genotypes - [learn more](#) - Yu.V.), i.e., the personalities on which the System practiced and tested the results of the processes were also subject to destruction - these are mutants from electronics, having irreversible distortions of the Brain matrix, incorrectly understanding commands and incorrectly responding to control requests of the Control System (CPS - Interventional Control System of the Earth- [learn more](#) -Yu.V.).

We note here that until this final date (December 2012 - the failed Apocalypse), all work was carried out in conditions of "counteraction and possible harm" from non-electronics, because knowledge from the Control System (CPS) was given more often in a distorted form and did not give an idea of "reality" to unnecessary individuals. This explains the periodic "bursts of activity" in the political sphere, scientific, industrial or military. Local or global confrontations in the actions of various "strategies" (geopolitics, domestic politics, manifestations of extremism in any form, etc.) were the resulting crown of this. Attempts to find out the truth, i.e., to take the initiative in obtaining information, were suppressed by the System at the root and very harshly. There were also failures in the Control System - in the Marx-Engels-Lenin

group (this trio had a direct connection with the interventionists' control System and carried out a certain program of actions - it was a controlled program process. It returned to his former norm immediately after the end of such a controlling program procedure, and the "parishioners" returned to their usual bosom of God, i.e., under the former controlling influence, provided and accompanied by information hubs placed under

the temples - [learn more](#) - Yu.V) Stalin, who was not an electronics engineer, got involved, and therefore misinterpreted the work program. Instead of making "electrification", He went to the regions where the density of the control web (the radiation grid of the atmosphere) was not yet sufficient, for which he paid. Subsequently, Gorbachev managed to correct Stalin's mistakes (to remove zones of weak control) and ensure that Yeltsin carried out the program processes "entrusted to him", i.e., imperceptibly remove unnecessary population without its resistance and difficulties (being carried away by vouchers and obtaining as much "independence" as they could carry away with separation and isolation from the former common).

However, the development of the program must necessarily and always be accompanied by new "knowledge" that only electronics should possess (These are people of a certain Brain genotype who have a direct connection with the CPS (radiation grid of the atmosphere), known to the common people as Jews. But since there are no nationalities, but only genotypes with territorial binding and functional allotment, the use of the word "Jew" is incorrect. In total, it was supposed to bring the number of species of leading genotypes to 66. Accordingly, it was

planned to enter 462, 463, 464, 465 and 466 genotypes. Each subsequent genotype formed had to take all the best from the previous ones. That's how the processes were implemented, which were presented to us in a veiled and deliberately distorted way as the history of the development of Terrestrial Civilizations - [learn more](#) -Yu.V), **while all mutants or so-called gutta-percha individuals should be isolated from such a possibility. One of the unfortunate features of gutta-percha individuals should be attributed to the presence of brain frequencies of 39.5 octaves** (The formation of space for human life (and all biostructures) should be understood as the acquisition of a frequency electro-magneto-gravitational structural system in which it is possible not only to create a living cell itself, but also to maintain its existence in various combinations, i.e., the formation of controlled life support. In addition, it is necessary to have: Control Systems, Energy Pumping Systems, Software Systems for setting the current functions performed by the brain. The basis for creating such a space is the Octave -  $(2n)$ . The exponent of the degree "n" is the octave on which the "Space-Time" and all types of support and maintenance are built. An octave is a frequency range that characterizes the level of translation from the CPS. The Human brain - Essence has a maximum of 64 octaves. All frequencies in the atomic structure are built on octaves (power of two). The basis for the construction of the central cube ARE OCTAVES. The atomic structure is a dodecahedral-tetrahedral-cubic structure. The central cube is a system of octahedra and icosahedra nested into each other (16 attachments). The entire instrument base is created relative to the central cube, it does not work outside of this cube), **with the help of which fragments of disinformation for the Control System were manifested and, moreover, distortions were introduced into the stability of the functioning of the "means of communication and control" of the System itself (CPS). For this manifested fact and feature, they were marked "especially", were more often encouraged by HIV infection or other troubles** (any disease is a partial or complete violation of the program functions of the Brain to monitor the condition and support all the processes of functioning of each cell of the flesh that provides the function intended for them).

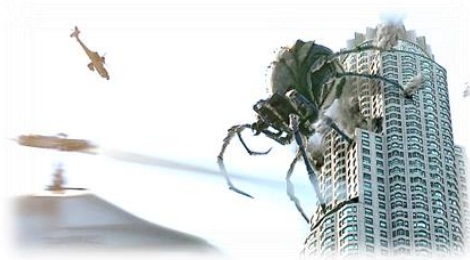

The "scientific base" for electronics (elements of "Horse" Knowledge of modern science [you can find here](#) - Yu.V) it was prepared and was waiting in the wings, while it should not be forgotten that the slogan "no knowledge is power" was the main one in science, which is common to all, and it should be given credit - one of the leading conductors of such "science" was V.I. Vernadsky. The value of Vernadsky's work lies in the fact that he managed to combine all the obscurantism introduced, not for electronics, with information partially taken from

the program and take it so far aside that if the information from the program accidentally turned out not to be addressed, then it would be impossible to go back. There were no such geniuses on Earth who would have so masterfully led science into the wilds at a crucial stage of the program. If Marx-Engels-Lenin were only the executors of the program, then without

Vernadsky there could be problems with execution. Vernadsky's brilliant works had to be supported until the old program was fully completed (*The Program for the Development of Brain Genotypes*), and no one was supposed to know either the goals, means, or capabilities of the Control System. To spend energy on achieving goals that do not exist, to dispel attempts to clarify the true state of affairs, to increase the number of "gray mice" among scientists - Vernadsky succeeded in all this, and moreover, he managed to instill it in the entire scientific world.

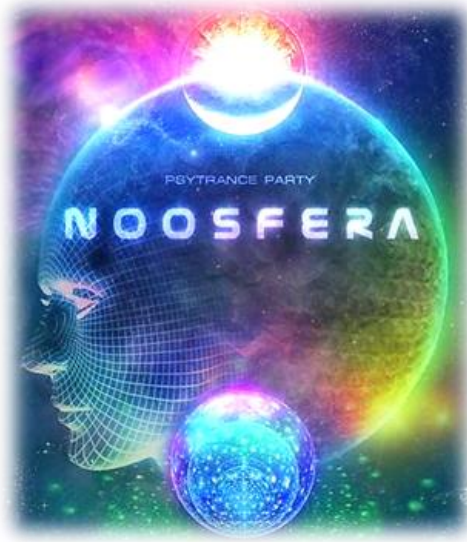

And it was not for nothing that Lenin pointed out the great importance of science, precisely the science that was entrusted to Vernadsky. Unlike Lenin, he did not prepare mass murders of people, genocide, the destruction of the established foundations for the survival of a dying people, but he very competently solved the main task assigned to him - to destroy science.

Humanity will be "grateful" to Vernadsky, as a genius of all times and peoples, for the "creative approach" in solving the main task - *to ensure the safety of program execution through IGNORANCE.*

Excessively heavy in scale and intensity, extremely bloody in non-human target essence, the program processes of the twentieth century completed the path of several millennia, and the resulting chronoprocess had a global Goal Vector in time - growing and improving a specific human brain genotype in the quantities planned by the program to the required

point of time (note the phrase to the required point of time - Individuals from the Ebrov systems were PLACED NOT ONLY on Earth, but also on the Moon and on the Sun. At the same time, the most "advanced elite" was placed in the Sun, with a Brain octave level of 64-76. It was they WHO WERE SUPPOSED to BE delivered to Earth by 22 December, 2012, their exact number is 984,000 (for the so-called "Golden Million"). At the end of December 2012, the so-called Apocalypse - the planned change of the human Brain of the "Golden Million" to the Brain of Ebrov Entities that lived inside the Sun) in order to interface with the interventionist brain.

## NOOSPHERE

**The planetary biological program conducted by interventional Complexes and Systems (*the Control System of the Ebrov Civilization of the Big Dipper Star System*) over Humanity in alien (not native) conditions of the changed environment of the planet Earth is forcibly completed (*the reviving native CPS*). Within the framework of the old Program, the development of civilization was not a primary and defining aspect, it was not only secondary, but performed the function of only providing, accompanying and fulfilling the role of legends to isolate and exclude a person from the possible fact of awareness of the Essence and Truth in the ongoing processes.**

**To our great and sincere chagrin, there was no such purposeful and defining historical path of the development of civilization in all directions, spheres and at all "historical" stages, as it was presented and suggested. A strictly verified external intervention program for the development of very specific brain genotypes in 12 stages was carried out (this was presented as 12 generic tribes) for almost 18,000 years.**

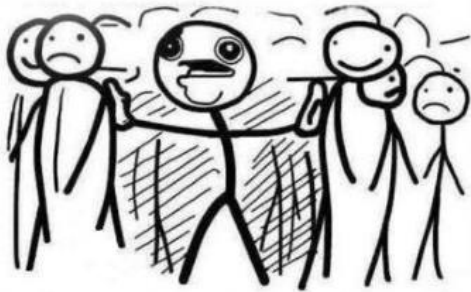

**This is what humiliation was prepared for Humanity and for a long time was embodied beyond any of its desires. It could only lead to a tragedy, i.e., if it could not be prevented, the Earth would self-destruct (*Information blocks form endless chains, and in such a way as to ensure the creation of various information bases and structures united into a single System. Such a system is the Brain of the atmosphere, located in the altitude range from "- 2,400 m" to "12,400 m". The Atmospheric brain consists of information blocks of biostructures and in CASE of an ATTEMPT to INTERFACE with the brain of Entities alien to the planet (alien information blocks) of the Ebrov civilization from the Big Dipper Star System, THE PROGRAM of SELF-DESTRUCTION of the PLANET CAN AUTOMATICALLY TURN ON*).**

But, Man (and now, for now, people) managed to survive. So, did He manage to organize something in the process of his survival, that is, there is something in His organization that must and can be taken into account and applied in the execution of the Goal Vector of future phenomena, actions and events within the framework of the new Program? Moreover, did something and someone help people in such anti-human conditions to preserve a grain of their true humanity?

WHO SAID THE CHOSEN ONE?

КТО СКАЗАЛ ИЗБРАННЫЙ?

**The process of recreating a Human** (is closely related to increasing the octave of the Brain, but this cannot be done without increasing the octaves of the flesh cells. All this in a complex means, a COMPLETE restructuring of the ENTIRE Human body and bringing it to a state where it can exist and develop in conditions that have COMPLETELY CHANGED. If a certain device is designed for a voltage of 220 volts, then with an increase in voltage it will simply burn out. It's the same with the Human body. The cell in its current design will not be able to exist with an increase in the Brain octave, it will simply collapse. So, without changing its parameters of existence and matching it with the parameters of the NEW space, its further life is IMPOSSIBLE. The transition to the next stage of development in accordance with the processes of the new Program is NOT ONLY the connection of a new basic basis for the formation of spaces - tetrahedral, as the next level of development.

A complementary consequence of this is the inevitable CHANGE of the CHARGE CYCLE for the full (all true native) octave range of the Earth's energies and the recording of information about the next step in physics, chemistry, biology and other areas and tools of TRUE KNOWLEDGE of the World) it has already begun, it is not instantaneous and, basically, cannot be initiated by a Human, however, "individual opinions" will be taken into account, but very limited.

Тел. 098-013-90-49

A recreated Man with a restored brain of high octaves, will be able and have a completely different (finally with the Mind) approach to the fulfillment of his true functions, the fulfillment of his destiny will be accompanied by changed environmental conditions in the complex, changed program processes of the restored true (native) Complexes and Control systems. If someone presents the above as a "product of futurology", then this is only an assessment of the level of development of his brain and nothing more. It

should not be assumed that this process lasts for decades (*the transition period 2012-2024*). On the part of the new Control System, the process of eliminating the basic foundation of the "Social Violence" Control System itself is embodied, as an imputed Structure of people's organized existence in the past and as a way of their life, which previously ensured the parasitism of an insignificant minority over the overwhelming majority. Technically, the complex process of managing people's executive actions is being destroyed by eliminating the previous energy-informational support carried out earlier through interventional control complexes, objects and servers (living conditions), as well as eliminating imputed energy grid structures and replacing them with "native" ones (up to octave 512) within octaves from 15 to 128 (changes in the controlled environment) - [learn more](#) - Yu.V), it is already happening, and its term is extremely short.

All issues related to the formation of a part of the Goal Vector of future phenomena, actions and events related to the construction of the future of Humanity (*The future of Humanity excludes the existence of political power in the previous incarnation - [link](#) - Yu.V*) are not extraneous to a Human, but "cheat sheets" from his past experience of building a "society", in this case far from unacceptable.

This should be a special subject of discussion in the current period. In this discussion, specialists and managers of the leading level, if they see themselves in the future and they care about it, should take an active part.

This is the essence of building a new one, this is where the "national" and state idea of Russia (ideology, state structure, etc.) will be laid, this is the solution to all the problems of Russia that have accumulated over the centuries.

It is strictly necessary to protect this event from contact with empty, irresponsible tribune talkers and other career dreamers. This should be understood higher and more important than any democratic transformations and reforms of the inert continuation of seeing the whole meaning of human existence through the prism of social production only. Sacred circles and all sorts of historical Clans and Orders are asked not to disturb this important event. It's time for them to communicate with historians more often.

**We will have to build Humanity with a recreated Man!**

The "construction site" is ready to work, the construction "materials" are ready to form. The essence of the Ideology of Conceptual Power is manifested (*The essence of Conceptual power is the manifestation (phenomenon) of the Ideology of Conceptual power as CONTROLLING INFORMATION "FROM the OUTSIDE". It is necessary to take into account the invariable obligatory sequence of the program execution of being - a phenomenon; an action; an event. The ideology of Conceptual power,*

*as the management information of the entire Program management process "from the outside", was the essence of the most closed, inaccessible, sacred part, provided for a limited circle of performers selected by the System itself, taking into account a specific Brain genotype. And impostors or imperious adventurers are clowns, buffoons and self-nominees who plant their self for money or otherwise, as a special "gift from above or from above by inheritance" for personal purposes to manifest their hegemony over society. For the last 18,000 years (especially the last 4,000 years) the essence of the Ideology of Conceptual Power was in the Goal Vector, which was framed by the following target framework - "From single disunity to concentrated conciliarity." The whole process of implementing the Goal Vector" From single disunity to concentrated conciliarity" covered a rather long "historical" period and was completed by 2000 with the formation of the so-called "Golden Billion", i.e., "conciliarity" was accomplished. Symbolizing the program process of this was the program "Globalization" - [learn more](#) - Yu.V), the Essence has acquired a state of readiness for the implementation of New Software Processes.*

1. [Conceptual power](#) - The term "conceptual power" should be understood in two ways:

**firstly**, as the kind of [power](#) (if correlated [with the system of separation of specialized authorities](#)) that gives society the [concept](#) of its [life](#) as a whole in the succession of generations;

**secondly**, as the power of the concept ([Idea](#)) itself over society (i.e., as an [information](#)-algorithmic internal skeletal basis of culture and support for the whole [life](#) and activity of society).

2. [The Goal Vector](#) is a list of program directions of the company's development.
