

Reflections on a given topic on the article by F.D. Shkrudnev "The Salvation of Saviors

(29 - 30 -31_series 369). Transformation

The articles are unusual multilevel, and, it would seem, contradict "everyday evidence." If earlier we talked about the role of the individual in history and about the objective laws of history, bearing in mind the relations of production, productive forces and their relationship to the means of production, then these articles present, as it were, the reverse side of both personality in history and the objectivity of the "laws" of history. The articles contain not only theoretical arguments, but also abundant factual material on the issues identified, chronological data on certain events and people who are given, and who is Russia's friend and who is the enemy, how the transformation of ideas about humanity takes place in certain conditions, and its mechanisms are shown. We have to think before answering any of the questions raised by ourselves.

The author is right when he claims that our reason, logic and common sense are **NOT ABSOLUTE** and independent truths, but a consequence of the structure of the world, its nature and laws. Even today, our logic and reason **BUILD THEIR STATEMENTS** based on axioms — truths accepted on faith because of their "evidence." If there were other physical laws in our universe, we would have different thinking and logic. Nikolai Viktorovich also wrote about the fact that there are other laws of physics, therefore, there is a different thinking, logic and a different mind.

There is **COMMON SENSE** — it is a continuation of the laws of the world in which we were born. Against this background, thinking is not self-contained, it is only a continuation of axioms. And axioms are based on laws... **NO** truth **SURVIVES** outside of the circumstances in which it is created and in which it functions. This is where an ideology appears and manifests itself, like a snake crawling out of the skull of Oleg's Prophetic horse and stinging him, who thought that he had anticipated the event of the future by parting with his faithful friend in advance, and confident from his daily experience that nothing threatens him anymore, and the verdict of the magus is a lie...

How this or that ideology is imposed on people – a powerful weapon for the destruction of any society that differs from this one at the level of the system of ideas, is reflected in the articles (we will talk about the combined article later). Ideology (from Greek. IDEO — idea; and LOGOS-word — a set of views, concepts, traditions that express the interests of the population of a country or a group of persons.

Simply put, **Ideology** is a briefly formulated program in the form of a system of ideas, concepts, reflecting the fundamental interests of classes, social groups, often reduced to a fierce struggle through military aggression for living space, and according to which this country lives, as well as it and weapons that should demoralize and destroy the enemy's side in this their struggle. This is also the "bomb" that explodes at the most inopportune moment, making many peoples and countries hostage to it. Here we are not even talking about simple human qualities, because they are not material and do not bring material dividends. But if there is an ideology of destruction, then there must be an ideology of creation. Both types of ideology are antagonistic towards each other and are in a constant fierce information war, going through stages, as shown by the author. The **STAGES** of the **DEVELOPMENT** of information are the stages of the development of people's lives with all the corresponding step-by-step embodiments of their being. The true **reasons** for the embodied expression of specific **STAGES** of the **DEVELOPMENT** of **CIVILIZATION** are **only the stages of the development of Brain genotypes** as an externally controlled process implemented through Complexes and Objects.

At the same time, aggressive ideologies have the property of uniting into a system and countering creative ideology by any means, because for its representatives, the main thing is the result – control through destruction within the framework of the Programs "Development of Brain genotypes" and Energy Biogenesis of the flesh of the body" through previously created genotypes of people within their purpose.

From Iz(S) toria shows that the plans, for example, the attack of a united Europe on Russia and its destruction remained the same for centuries. Their "gentleman's set" included: **1)** as the primary striking force, the **IDEOLOGY** that unites them into a system; **2)** the theory of the **"exclusivity" of European peoples; 3)** claims to the living space and resources of "inferior peoples." And, as history itself shows, the peoples who adopted someone else's ideology disappeared from the history of Europe and from its geographical map. Despite the fact that the Germans had Slavic roots, this did not change their plans for the destruction of Russia, as well as the plans of the Poles. As you can see, the "laws of blood" do not play a role here, so many Slavic peoples (Bulgarians, Montenegrins, Czechs and Slovaks, Poles, Bosnians, etc., they always turn out to be on the side of our enemies, despite the sacrifices of our people, incurred for the sake of "our blood brothers." And the point here is not in the common blood, but in the brain genotype. And the author of the article correctly notes: . Each individual typology of the deformation of the Mind Structure is **the so-called Brain Genotype**. The whole story, as the implementation of the Brain genotype development program, is the **Main Law of History**, and not anything else.

It is correctly noted that the collapse of the foundations of thinking means that a person is locked in a cage of everyday evidence. This also applies to science. All the sciences created by man reflect the particulars of individual floors of reality, each having its own dimension, because there are so many scientific directions, theories in each science, and they by their nature do not allow you to rise or fall to another floor of dimensional scale.

"Everyday causality" sets the limits of cognition every time when consciousness passes from one level of dimensional scale to another, where previously found patterns fail and do not work. That is why, in the transition of Cognition to a new level of dimensional scale, it is necessary to move from the previous level to the new in the methodology of cognition: in the transition from the meso-level to the macro-level (and vice versa), to use ***dialectical materialism***; in the transition from the meso-level to the micro-level, to use ***materialistic idealism***; and when moving from the micro-level to the levels, for example, of the pre-atomic dimensional scale (primary matter, particles of magnetic and electric matter, or primordial principles), use the ***methodology of energy-informational dialectics***, not forgetting that objects at different levels of dimensional scale have their own characteristics and the patterns found earlier reflect the features or patterns of these levels, and not those which we still want to know.

Cognition of the world takes place in stages: starting from the macrocosm, on which the Person himself is located, and then moves to the meso-level from the positions of the macrocosm, on which both the studied and comparable objects are located. Next comes the knowledge of the meso-level from the standpoint of the macrocosm and its laws found during its cognition, which often introduces errors in the knowledge of the meso-level. But already at the macro-level, knowledge is replenished with information about the meso-level, etc. Finally, the transition to the knowledge of the microcosm, but so far only from the standpoint of the laws of the macrocosm and the meso-level, garlands of contradictions (dialectical), the resolution of which leads to New knowledge about the three levels, but already taking into account the knowledge and laws of the micro-level.) Here we can talk about the stages of development, for example, physicists at three different levels: the ***macrocosm*** — the cosmos (Universe), the ***mesomir*** — the middle world (including our being, our is (Z)torii) and the ***microcosm***. Accordingly, cognition went in three ways: "DOWN" into the ***microworld (microcosm)***, i.e., deep into matter and "UP" — at the ***macro level*** — into the ***macrocosm, and at the meso-level (in the middle world)***. Man himself remained in the ***middle world***, where he could measure something, touch, examine, etc., both with the help of his senses and with the tools he invented. For cognition at other levels, he is forced to invent appropriate tools and devices that enhance part of his capabilities or develop himself by raising the octave of his brain.

It is also necessary to distinguish a science covering the whole universe and a science reflecting and radiating some particularities of this universe, which are private sciences. This is exemplified by N.V. Levashov's concept, which covers the whole universe, its basis, its backbone.

And there are particular theories, which cover only some important particular questions of the Universe within the limits of some interval of measure scale, e.g. systematic physics by A.A. Luchin, KTV by B.V. Makov, unification theory by V.S. Leonov, etc. In science, the role of ideology is performed by its antipode, the methodology of cognition, which aims to find out **HOW** the world is arranged, so that then, using ideology, they build the world that is needed by those who rule it.

The tradition of supremacy in Europe has **NEVER DISAPPEARED** from the German ideology (including the ancient ones, when there was still a Slavic state – Ruskolan). Everything is so. It is completely incomprehensible why, when the political discontent with Russia on the part of United Europe reaches the "boiling point," then the **GERMANS**, Germany, **BECOME** the main armed force for "correcting" Russia? Maybe because of "kinship" or his inferiority when comparing himself with the Slavs, treating them as fellow tribesmen only at the subconscious level?

Alas, the victory over the Goths did not bring peace to Rus — Ruskolan, hordes of nomads fell on it: Huns, Heruls, Yazyges... Since the IV century, the Huns began to crowd Ruskolan, then the Khazars, Polovtsians, Pechenegs, Crimean Tatars and Ottoman Turks. Up to the XVI-XVII centuries, Ruskolan was inhabited by descendants of Ruskolan – Circassians and Pyatigoriens, some of whom remained here after the exodus of the Rus to the Dnieper, where the third Kyar (Kiev) was founded.

After the defeat of Ruskolani, the state of Alania and a number of Slavic tribal associations that preserved the Veche way of life arose in its place.

Ruskolan is one of the major state formations of the Slavs in the Azov Sea region, which existed 16 centuries ago, whose history is completely forgotten thanks to the **German professor** who wrote Russian history for Peter I.

This land is the source of the Slavic people who called themselves Cherkassy, known by Cherkassky lanes in Moscow, the cities of Cherkassk and Novocherkassk. Cherkassy inhabited, according to Vatican sources, Pyatigorsk and the Dark-Balkan Principality, and are now known as "Cossacks."

For the first time the hordes of Tartary invaded Alanya in 1222, and in 1236-1239, having defeated Kievan Rus, the Horde entered deep Alanya and captured the capital after a month and a half siege. The last Alan city of Dadaks (now the village of Elkhotovo) fell in 1278. The invasion of the Horde led to the devastation of the plains, the resettlement of displaced Turkic-speaking tribes to the mountains and the prolonged isolation of communities settled in the highlands. The emptied Alan and Slavic lands were occupied by Adyghe tribes, from which Circassians and Kabardians stood out. The formation of the majority of modern peoples of the Caucasus was completed in the XV-XVI centuries and **their unification** began under the Russian leadership. The Slavic brothers did not particularly seek to unite with Russia, except for the Serbs. In 1552, Circassians and Abaza voluntarily joined Russia. Starting from the XVI century, the Caucasian peoples began to return under the wing of Russia again, and the Russ reunited with their tribesmen.

So will be our time: the Slavs (Russians, Belarusians, Russian Ukrainians, Serbs and other Slavic peoples will unite in a single state with a single ideology. No more parasitic formations on our land are foreseen.

It is necessary to recognize, that Germans have had a great influence on the formation of our culture through the Romanovs. And the British at the last moment (with the victory of Russian arms) begin to support Russia, and not because of kinship, but for the benefit (there must be something stronger than family ties), which promises them our victory. The British do nothing without benefit - they are pragmatists. They even refused their relative Nicholas II to save his family. What human qualities in the English can we talk about?

As the author of the article notes, a person (in our perception) strange as it may seem, Abram was **NOT NEEDED**. Only a new "shirt" was needed for a certain **4XX genotype**. **We are all the "product" of a millennial Management System**. Each subsequent genotype formed had to take all the best from the previous ones.

Therefore, the imputed program process for the **INTRODUCTION** of **BRAIN GENOTYPES** and their gradual development was one of the primary determining root signs of the formation of so-called nationalities within certain nations, hidden from the consciousness of people, as well as the formation, mainly, of a special group of performers framed in the emerging structure of the **"Golden Billion."**

One of the doctrines that solve many issues by the power of money or through ideology has become Zionism (the racist doctrine of the superiority of Jews over other nations), which began to actively influence the life of many states through the power of money. At first, its center was Spain, then Poland and finally Russia – representing the vanguard of the white race, standing on the way to the domination of the world by the 4XX genotype, which included Jews who became organizers of the Great Russian (Jewish) Revolution in Russia, which was preceded by a chain: the creation of the RSDLP, the Jewish Workers' Party, the Basel Program, the Zionist Congress in Moscow, V. Lenin's "April Theses" and the bid to seize power.

With the introduction of brain genotype **442**, the phase of civilization began – control through the **force** accompanied by **Complexes**. In the legitimacy of such a construction, the subjective factor is **COMPLETELY ABSENT**, since it has been replaced by the power of money, the power of power, the power of sacred and various confessional influences.

They tried to convince us that everything that happened in the world was the result of the historical laws of the development of society. In fact, there are no historical patterns, the author of the article claims, because historical events are caused not by the **ACTION** of "historical laws," but by living people within the framework of the managerial development process of the entire System, one of which is the embodiment of the development program for the entire brain genotype 44, namely, the beginning of the formation of a special group of performers burdened with the emerging structure of the "golden billion."

Through agents of influence, traitors, a "traitor goat" who led the people to the slaughter, the fifth column, representatives of the 4-XX genotype came to power. At the same time, constantly feuding and bickering with Russia, Great Britain always turns out to be its ally in wars with a united continental Europe. And Germany is always the enemy.

It is necessary to emphasize the important and main conclusion of the author of the article: there is an "objective process, the change of which is **BEYOND** the **CONTROL** of **ANYONE** who happens to be directly or indirectly involved in everything that is happening. All this relates directly to Russia and today requires a **SPECIFIC PUBLIC IDEOLOGY** — *an ideology that carries a real global idea, which people will understand and accept, which will unite all the peoples of Russia, and which will unite all the peoples of the World.*

I.M.Kondrakov
