

The Path to Truth does not begin with betrayal.

Author: F. D. Shkrudnev

The hardest thing is to write about the betrayal, meanness and lies of those **with whom you have passed a segment of your life path, a difficult and responsible segment**. A segment of the path that brought a concrete result, a result appreciated by people who expressed their gratitude and appreciation to you and your like-minded people. The result, which was conceived, came to life and became for many, many people **HOPE AND FAITH** in the correctness of their choice, in this most difficult time of trials for everyone. Going along my life path for more than one decade and having learned a lot, understood, and appreciated not in words, but in fact, I confidently know that **there is a price for everything and even more so for meanness**.

For meanness and for betrayal, a payment receipt **WILL DEFINITELY COME**. You can forgive human stupidity – it can be unintentional, but **YOU CANNOT FORGIVE human meanness – it is always intentional**.

We are living in a very difficult and very interesting time. There are a lot of bad things around us, but nothing just happens and there are positive moments in all the bad things. Although this positive often comes through **PAIN AND DISAPPOINTMENT**, and in order to see the good in all this, we have to look at what is happening as if from the outside. And the good thing about this is that our **VERY DIFFICULT**, our hard times **reveal the whole essence of a person**; they reveal him, forcing him to show all his true qualities. Sometimes, in doing so, masks are torn off. Masks of friendship, loyalty to the cause, simple human decency.

It is really very hard and painful for me to write this, because it will be about a man whom I considered my friend and closest associate for many years. A man whom I trusted and valued. A man whom I have taught a lot, given a lot and for whom I have done a lot. I am talking about **Alexander Kalenyuk**, known today to a certain circle of citizens of German-speaking countries as **"Alex Kalen"**. I WILL NO longer mention him by name in this text, since for me he is now simply **"this man"**, although to be more precise within the framework of cognition, the concept of "people" is more suitable than "man".

Some time ago I wrote an article about him and his current activities [1], which, in general, has already dotted the "i" and OUTLINED MY position in relation to this person and what he does. Perhaps that article of mine **was the last attempt to reach him**, to give him another opportunity to realize something. Well, he took it differently. Since the information from that article began to reach German-speaking readers and buyers from the "**Orania website [https://orania-zentrum.de /](https://orania-zentrum.de/)**" and before this person, as well as before his "companions", there was a **CLEAR THREAT** of losing customers in their so-called business, they decided to write a refutation article. Refutation of both my words and the words of Boris Makov (NII TSUS). To be more precise, it was not them, but "this person", I am more than sure, **DICTATED** the **TEXT**, and the signature was BY the owner and "hostess" of this site and "store" **FOR NOW** (I emphasize and will explain later – while still). It is more than likely such an action characterizes "this person" and the truthfulness in the above. After all, you can always say later – "... I was misunderstood or the information I gave was not presented in the right way...". I want to note that "this person" **DID NOT** have the courage to not only publish this so-called "refutation" in Russian, bringing its text to the "SvetL" users (readers from the text below will understand why), they **DID NOT** even DARE to publish (or rather, "this person" decided so) on their website, instead they only posted it in the mailing list, hoping that this text would not go further than their users. Yet, I ended up with the text, and not only me, because people in Germany began to ask questions and decided to figure it all out for themselves. This, too, speaks volumes today and will come in handy in the analysis "created" by "this man. I consider it necessary to do it for them and to make this text fully public, so that they could not avoid answering not only to those who are still their "admirers", but most importantly - to the users of the "**SvetL**" **Programs** not only in Russia, but also in many countries of the world, including Germany. I am grateful to them for what they have done, because in moments of mortal danger, the true essence of a person is revealed: one covers the commander with his chest, the other hides behind other people's backs.

At the time when Nikolai Levashov left, and the SvetL technology was massively attacked, **I wrote a number of articles about the "Looking Glass"**, which can be viewed on my website. A lot of water has flowed since then, the "heroes" of those articles have already been forgotten, and the "SvetL" technologies live and develop, continuing to benefit people. **But I didn't think that the Looking Glass would manifest itself through my friend and colleague at that time.** I will briefly comment on this cited and distributed "in defense" text under each paragraph and then give more detailed explanations. I will comment in the same way as I did in the articles "Through the Looking Glass". Because this comment (then) clarified a lot to people who also had a lot of questions.

Here is this text, which is highlighted in a different font by him, and my comment is made in blue.

* * *

"all this would be funny if were not so sad..."

Hello, dear reader,

The information that is now being distributed online about Alexander Kalen and the Orania Center is a complete lie and provocation. From 2009 until the day of Nikolai Levashov's death (11.06.2012), Alexander Kalen was his confidant, his friend. He received personal training from Levashov and was initiated into the SvetL technology, into the operation of the generator of the first matter of LIGHT, into universal healing methods and various metaphysical techniques, such as the further development of SvetL technologies, modernization of territories, development of new healing structures, individual healing work at a distance and much more.

*Let me begin by saying that Nikolai Levashov has **never had** any confidants, **let alone friends** with that name. Nikolai Viktorovich, at my suggestion and due to certain circumstances, has seen **the above person a couple of times to solve purely technical questions**. Nikolai Viktorovich **had no** "confidants", let alone "students" in Russia. After his departure, "**Lieutenant Schmidt's children**" **appeared** [2] (explanations by link for a foreign audience) and their number, as you can see, was replenished with "this man". All that is listed regarding the "SvetL" technologies concerns only one person to whom the matrix has been transferred, the corresponding "rights" to use it and much more, which has already been said repeatedly and confirmed by experience and application – and one can only advise reading the publication "**The Mirror is not his soul**". It may seem immodest to some, **but that's me**. And for the **illiteracy of "metaphysical techniques", for "further development of SvetL technologies", "modernization of territories", development of "new healing constructions"**. Even the hand does not rise to write comments on this poorly connected set of words. I will only note that they came out of **the mouth of "this man", today called a doctor (Doca tory), also of technical sciences, let him continue to be a doctor!** I also wrote this for Russian users of the Technology who, when communicating with "this person", did not even know that they were communicating with a doctor of sciences. However, today, in the charter of the Russian Academy of Sciences, it is laid down, for example, that the director of an enterprise (i.e. any commercial stall) can become a doctor of sciences. Here I will also note that "this man" has **only a philological education**, nothing more – but his language is well suspended, which I cannot help but note, and he uses this successfully for himself.*

Levashov not only healed Alexander after a serious accident, but also further developed and transformed his brain and abilities. Over time, Alexander became a talented healer and developer of SvetL technologies - a person who transmitted and directed Levashov's ideas and vision.

2 Children of Lieutenant Schmidt are called today – swindlers, and impostors posing as descendants of great people. Read the novel by Ilf and Petrov "**The Golden Calf**".

I will note here that there was an accident with "this man", but in adolescence, many years before meeting Levashov and I. When I met him, this man was healthy and full of energy. Draw conclusions about the participation of Nicholas in his restoration yourself. Just like about everything else. The real "brain accident" occurred much later and Nikolai could no longer have anything to do with correcting its consequences – he left. And if... it is not known what would be left of the brain of "this person".

Together with Nikolai, Alexander Kalen developed Svetl products, such as pendants, bracelets, healing rings, complexes and others. There are documents and drawings about this. Some products, such as "Svetl-Flora", were developed personally by Alexander.

*"This person," as I have already said, **did not possess any abilities before and does not possess any abilities now, neither in metaphysics (in their terminology), nor in healing, nor, moreover, in the possibility of any kind of development and improvement of SvetL Technologies.** He **did not have and does not have** any understanding of the device of the SvetL generator and the principles of its operation, except for what is set out in the public domain, in Nikolai's books and in my books and articles. Yes, with his help, models of silverware were created (worked out), which my friend, a famous jeweler, brought to life. Yes, he assisted in setting tasks for creating a software package (in electronic form) for the SvetL Complex. Yes, he, at my suggestion, after I carefully studied the possibilities of silicon (mono and poly silicon) with the help of **academician D. S. Strebkov**, a professor and a true doctor of technical sciences in the field of renewable energy sources, found a production facility for growing silicon crystals and agreed to purchase silicon wafers for Complexes and for the project "SvetL-Flora" that was emerging at that time. But all the calculations of the plates were carried out without "this person", because the participants did not know that they were dealing with the whole "doctors of technical sciences", and "this person" was silent about it – probably out of modesty. I would also like to note that the carriers of the Generator - bracelets, pendants, silicon plates ("SvetL-Flora", Dome - Di) - everything was created after the departure of Nikolai Levashov, **so it was impossible to develop all this together with Levashov, but for doctors of sciences – probably, yes!***

Alexander also led the development and distribution of all Svetl products in Russia and around the world.

*"This person" at that time, was one of the sellers of products, performed this work quite well, but, unfortunately, he did not listen to the opinion of the people who controlled this process, that **he was already engaged in financial fraud at that time.** He was mainly engaged in sales in Moscow and partially in some regions of Russia. And Russia is also a part of the world...*

Alexander made all the home pages for Levashov - www.svetl.name, www.svetl.org (this site is closed as unnecessary), www.levashov.world, <http://www.levashov.club/> (this site has been closed for several years) and even www.rnto.club, which are used to this day.

*The sites live on and do their thing. Yes - he participated in the creation of these sites, **and it could not have been any other way**. He took part as my confidant and as the technical executor of the "RNTO" team, which worked out the necessity of creating these or those sites. These sites were not created for Levashov (who, by the time he created them, no longer existed). They were created to promote and spread the information that Nikolai Levashov left for all of us. They were created so that the information published on them could become the knowledge of people who read and study them. They were created to promote the **SvetL Programs** and new technologies, which is becoming more and more in demand now. One thing is surprising - why the "creator" of these sites - having technical keys to them and directly involved in the maintenance of these sites - **has not yet, on any of them** (for Russian admirers and not only) told about the "Orania" Center, "devices" and complexes "released" under the brand "SvetL" by him, in this Center and did not hold any video-seminars for Russian users of **SvetL Programs** and admirers of websites, such as "DNA-level rejuvenation and regeneration", "Love between man and woman, liberation from telegony", "Activation and increase of brain vibrations" and so on. Those who wish can get acquainted here -- <https://orania-zentrum.de/videos/#heilvideos>.*

Probably only out of personal modesty....** For the information of Elena Martin and the "team" of Orania, I want to inform you that "this man", for the "huge work he did" – more than half a year ago, at the request of the participants of the "RNTO", **was expelled from the "Russian Scientific and Technical Society" (RNTO)**. I think that comments for some reason are unnecessary. I will only note one thing here - in addition to the fact that the site has been created; it also needs to be maintained. The sites were run by other people whom I identified. And I am grateful to Anastasia – at that time the civil wife of this man, who perfectly maintained the RNTO website, on which all the main information was posted. Now this site is run by other people. For some reason, they forgot to mention the project developed at the time by "this person" and the website www.kalenika.com **which successfully failed only due to the greed of the creator, which was already apparent at the time.

In the summer of 2014, Alexander met Victor Martin/Orania Center. A close friendship and cooperation was established between them. In 2015, Svetl products came to Germany and Europe. The distribution and further development of the "SvetL" technology was carried out by the Orania Center, Elena and Victor Martin, in close cooperation with Alexander Kalen.

It was an attempt to establish relations with the Orania Center and involve the Center in the dissemination of Technology and information in Germany.

New products have been developed in the Orania center: Svetl - Svetl for children, Svetl for animals, a generator for the room, a good way, Svetl Eat and Drink, Svetl for water. These products are protected by copyright, and the trademark "Svetl" is registered in Germany by Orania-Zentrum.

All the "new products" were invented by "this man", who even then planned to go the way he went. His proposals to expand this line were rejected by me and banned, except for the implementation of those Complexes that have already proven themselves in Russia. **This was also a step towards the beginning of his planned charlatanism.** And the level of his "competence" proves the fact that a significant part of the above list is completely illiterate, because in principle, **the products do not have a platform for placing the Generator**, and it is impossible to install the generator on any plastic in principle. And this is another evidence of the fictitiousness of the so-called status of this doctor.

Above is an example of such a product made entirely of plastic. **It is impossible to install a generator on it, even with the "application of vibrations"**. I don't know what right and what is protected, from the listed, but after Victor Martin's death and my request to "this person" to support Elena Martin in this difficult hour and help her to keep the structure of the Center - I found out that in Germany **the mark "SvetL" is registered and as I was told - by "crafty Elena", as the logo is registered only in Russia and has no international status.**

And Elena, as I was told, **did it only in order to legalize products (besides Russian) placed for sale on the Center's Website.** Now, it is not difficult for readers to guess who conceived all this, implemented it and is now trying to defend his foundation of a beautiful, in his opinion, life.

Alexander regularly updates the "SvetL" generators - as he was taught by Nikolai Levashov. This is a big metaphysical job that requires a lot of knowledge and skills. He is constantly working on the modernization and further development of these generators.

Yes! This is difficult and hard work! But Levashov never taught "this person" to "update, and even regularly .." and you can update anything, but not the generator, **which is not subject to updating, or modernization, because it is a Generator, and it is alive!**

Alexander continues the Levashov case. You can get to know him personally, see, hear, and feel his healing work at open online meetings and other events.

Of course, you can watch and evaluate. I just want to remind you here that **Levashov has never held meetings online!** All live meetings were recorded. And these meetings were never exhibited by Levashov (I'll cross out this fact) on YouTube, but were posted only on Levashov's website, which had generation (see my books for details), which made it possible to make both the meetings themselves and the sessions that he conducted at the end of the meetings effective when viewing. But the Doctor of technical Sciences probably did not know this until now.

To date, Alexander has thousands of clients in Russia, Europe and around the world who have experienced his healing work, and several hundred grateful reviews (recorded in writing) about his healing work, master classes, seminars, the school of healers, "SvetL" products and its updates.

That's what I'm writing for those thousands of clients both in Russia and around the world – where this article of mine will be posted - I promise to do it. And people (customers!) let them decide for themselves! After all, it has been scientifically proven that all occult sciences and the doctors who carry them are from God, which is the creation of the Universe. And this must be treated as a divine phenomenon.

Evidence that he can do a lot can be seen and read not only in reviews. There are records and documentation using dark-field microscopy. The blood was taken from a person suffering from leukemia (the last stage). Within a short time (about 15 minutes) after Alexander's healing work, lymphoid cells began to actively move in the blood, which were completely motionless and inactive. From a medical point of view, this is a miracle. This was also confirmed by therapists who were present on the spot. Here is the link:
<https://youtu.be/6IAIcIY7X6Y>.

I even took the trouble to look at **"this miracle" and at the therapist myself, having learned about dark-field microscopy**. He asked me to translate all the arguments on this video. I have no doubt that both the doctors of sciences and those present there (together with the therapist) know what leukemia is, and its last stage. And they even know what blood is! But why doesn't the "experimental healer" know that if the blood is taken and pulled out of the body, it becomes dead? And the lymphoid cells probably began to move from fear of impending death. Let me explain that every cell of the body, even the lymphoid, is controlled by the brain, the control system of modern medicine is not known. In addition, the structure of the living cell itself is unknown. Studies under the microscope are studies of a non-living structure (devoid of connection with the control system), so all recommendations relate only to dead structures. It is a shame that doctors of sciences, and even "Levashov's disciple", do not know this. Well, about lymph, plasma, primary matter and about leukemia - I will refrain.

There are many photos of the aura that were taken after Alexander's healing work (seminars, remote healing). On them you can see how the designs of the Svetla "work"/they glow for people. There are many small and large miracles of healing that occurred after Alexander's work. He doesn't talk much about them out of modesty and focus on the main thing.

I want to ask Elena Martin a question – I would like to meet the photographer! I just want to note that there is no more meanness than to do meanness under the guise of modesty, virtue and integrity. I think that all the "admirers" of "this man" will understand me.

All people with sensitivity or clairvoyance can confirm this. It is a pity that some people who personally received healing, knowledge and great support from him, who studied with him and at the Orania Center, are now spreading negative information about him, Elena Martin and the Orania center. Unfortunately, this phenomenon is not uncommon. Such people also existed in Levashov's entourage. The worst, most vile information was spread about him and his wife; poisoning campaigns were carried out, which ultimately contributed to his death. No one is immune from mistakes, and we are all on the path of development. It is often enough just to feel, sense, trust yourself and open your own heart to determine what works and what does not, what is the truth and what is a rotten lie.

The death of Nikolai, and especially his wife, does not need to be touched – even the doctorate of sciences, who was with me both at parting and at cremation and knows perfectly well (though from my words) about the cause of the death of Svetlana Levashova and Nikolai. This topic is usually touched by those who are looking for excuses in their deeds related to the name of Levashov. Trying to raise their importance with such blasphemy.

It was thanks to Alexander that "SvetL" technologies and products became known in Russia and became useful and important for many people. The fact that many people in Europe and beyond have Svetla generators, that many people can study and use this technology in various ways, is all thanks to the Orania Center in collaboration with Alexander.

There is no doubt about the merits of the Center, especially related to the latest "explanations". From the words of "this person" - technologies are not separable with so-called products. However, products, depending on the technology, can be purchased on the market - even in Germany or at the Orania Center, which sells a lot of all kinds of products, including online seminars (although paid), as "products suitable for consumption". **I am very sorry that Levashov did not live up to this time.** He probably would have expressed his "gratitude" to both the doctors and the Center.

The fact that all clients and friends of Orania Center can enjoy the most modern Svetl updates adapted to the vibrations of time is due only to Alexander - his enormous tireless work and further development for the benefit of people, animals and plants.

We still have a lot to do. And loyal friends are with us.

Here, I would focus on animals and plants – it would be more accurate and clearer for the perception of all the admirers of the Orania Center. Leaving alone the "vibrations of time" - those who wish will deal with it themselves, and with those who "fell out" of it, and even wanting to.

In conclusion

Levashov always said that talented people are surrounded by envious people, and taught the following.

"The dogs bark, the caravan moves on. This means that you should not give your attention to envious people and slanderers. They will always be with someone who can do something. Don't say anything to them, because in slander you can't beat them. They have no other task than to slander, in which they are skilled. But you do what you do. People will appreciate what you do - and that will be the majority. Don't waste energy and time on discussions and proof - your proof is your doing".

It pleases me that this is taken **from my book, where I referred to Nikolai Levashov,** with only one remark both for the Center and for some people - Nikolai Levashov never taught anyone! It was not in his rules. He gave information and watched how this information was received and acted upon. **And this is one of his merits in helping people find their way:** "fodder", of course, did not always correspond to "horse" (there is a Russian proverb: "fodder for a horse", used in the meaning of a waste of time, effort, and money).

All healing and protective constructions that Alexander placed on you or on your Svetl products during his healing work can be removed by him personally at the first request. You only need to write to us.

Wow! But I can't. Nikolai, probably, due to his workload in creating the products of "SvetL" and possibly others, together with the doctory, **forgot to teach me how to install and remove protective and healing structures on people!** Oh, Nikolai, Nikolai! How did it happen – he taught the docators (probably with practical classes), but he didn't teach me. And how did the doctors of sciences forget to write here about the Generator that I moved from a castle in France to the territory of Russia to a place known to "this person". And why does he still not apply his capabilities in his activities in Germany? From Germany to the generator is just a hand stretch...

With love and best wishes

Elena Martin and the Orania team

(the end of the text and explanations from Elena Martin, and most importantly - from the Orania team).

This is the kind of comment (soft) I give to this "exculpatory explanation" - sent out in a mailing list to so-called "users" in Germany.

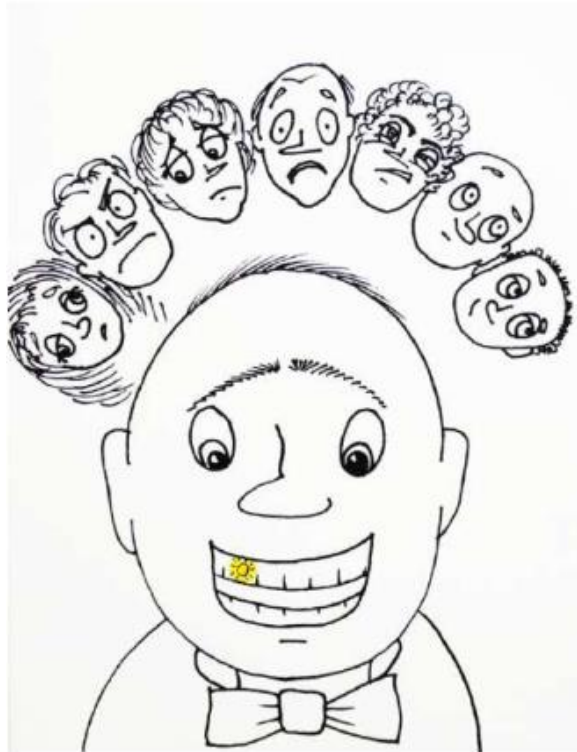

And as a result :

In this text, signed by Elena Martin and the Orania team, everything is a lie, from the first to the last word. To improve perception, I repeat once again – "This person" has never been a confidant of Nikolai, has never been his disciple. Yes, two or three times I BROUGHT him to Levashov, in order to understand the tasks and specific instructions. Yes, of course, he played a role in the development of SvetL technologies as my assistant and did that job well, he should be recognized. But no more than that.

He did not have and could not have any access to technologies, to the principles of SvetL generation, and even more so to the creation of a Generator and a generation matrix. Just as he had no access to any healing methods, metaphysical techniques and other things that Madame Martin attributes to him, and, in fact, he attributes it to himself, without even knowing what he is talking about. "This person" **DID NOT HAVE** any abilities before and **DOES NOT HAVE** any abilities NOW, neither in metaphysics (in their terminology), nor in healing, nor, moreover, in the possibility of any kind of improvement of SvetL technologies. He has no understanding of the device of the SvetL generator and the principles of its operation, except for what is set out in the public domain, in the books of Nikolai and in my books and articles. Yes, I'm afraid he does not understand this either, just as he does not understand what is written in the "OFCH" and other materials on the website of the Research Institute of the Scientific Research Institute [3], which he also got to and began to attribute some of this information to himself. Probably, this was the impetus for the assignment of the title of "doctors of technical sciences".

³ Scientific and Research Institute The Center for Preventive Strategies.

If he had understood, if he had realized this information, realized what the "SvetL Technology" is, then, I think, he **WOULD NOT** have gone further by treachery and outright lies, deceiving residents of Germany and other German-speaking countries. All the activity of "this person" on the Orania website consists in the **implementation of fakes THAT ARE NOT CARRIERS** of the SvetL generator, and, as it turned out, for a long time. **Everything that is sold on the Orania website under the SvetL brand is ABSOLUTE PACIFIERS**. I declare this with all **responsibility**. Also, this activity is connected with the **BANAL DECEPTION** of the site's **CLIENTS** and participants of the so-called seminars held by him, at which everything is promised - healing, solving karmic problems, increasing the octaves of the brain, solving infertility issues, all kinds of protection from everything that is possible and impossible. **He is not even afraid to declare the solution of karmic problems related to abortions**. He is already a direct **messenger of supercivilizations** and "breeds" gullible people (seminar participants) and not only this, even on their behalf.

And there is only one reason for all this – **BOUNDLESS GREED** and willingness to do **ANY MEANESS**, any betrayal for the sake of profit. I feel sorry for him, because a man who really had the opportunity to study, develop, grow, gave up on everything for the sake of a banal "loot" (for the translation of English and German I will use "loot" - all Russians understand it as - dirty money). There is no other way to put it. Money is earned by labor, and "loot" is earned by deceiving and cheating others.

He is not afraid of the responsibility before the entities of his deceived people, who, because of his activities, believing in his false promises, **closed the way to the true development**. He is not afraid of the realization of what will become of himself, of his soul essence, for such deeds. Although, more likely, he has no awareness and no thoughts about it, simply because he does not believe in anything except "money". You can forgive a lot of things. But not this kind of thing. I thought he was an intelligent enough man.

Unfortunately, I was wrong. Otherwise, it cannot be explained by extreme lack of intelligence. Here I want to emphasize that, unfortunately, my **Kamchatka friend, Alexander Yakovlev**, who also considered "this man" to be his friend, recently left. But I am sure that if he had found out about such a thing, **he would have flown to Germany and made a physical "remark" to "this person", deleting him from the list of his friends. Human greed always breeds human meanness.**

I'm not saying **HE BETRAYED ME**. It's not about me, although when friends and colleagues betray, it's very painful. He betrayed many people who believed him, both in Russia and in Europe, he betrayed the cause, the devotion to which he **SKILLFULLY PORTRAYED**. **He betrayed Nikolai Levashov, his memory, whom he dared to call his friend and teacher, and now deceives people**, but, in fact, not on his own behalf, but on behalf of Nikolai, because for many people, even in Germany, it is **THE NAME** of **Nikolai Levashov** that is **SIGNIFICANT**, and not "this man", whose name will be forgotten very quickly. He even has several names now. None of them **WILL BE SAVED**. And if people will remember him for some time, it will be only as a scoundrel, a traitor and a liar. But even this memory will not last long, because such people do not deserve any memory. Oblivion is their true reward.

There are **THREE KINDS OF SCOUNDRELS** in the world: naive scoundrels, that is, convinced that their meanness is the highest nobility. Scoundrels who are ashamed, that is, ashamed of their own meanness, but with the indispensable intention to finish it all the same, and, finally, just scoundrels, pure-blooded scoundrels. Let the reader determine for himself which category "this person" belongs to.

And the last thing I wanted to say to Elena Martin, who has **NOT YET UNDERSTOOD** who she is dealing with. At one time, after my acquaintance with "this man", my very good friend, having found out about it, without going into details of his relationship with "this man", whom he also knew, told me that "... **I never had any dealings with him.**" He said that "... at the most crucial moment" this person "will betray and sell out both me and the cause." I didn't listen to him then. And he was more than right. That's why I tell Elena - listen to me and listen carefully to what I have written.

He will soon betray and sell you, using your credulity today. He only needs **YOUR CENTER** and **YOU AS A TRANSLATOR** and nothing more. Even the relationship you're in with him today won't stop him. **And in confirmation of this – this is his website - created recently - <https://www.deu.alexkalen.com/>.**

Remember these words. **I HAVE NOTHING MORE TO ADD.**

P.S.

Dear friends and admirers, those who seek to understand, including why such things take place and especially concerning our friends in Germany - if you are offered and will be offered (no matter where, in Russia, Germany, America or in the Himalayas, money to change the "level of perfection of your Mind", improve "your mental state with the aim of your own career or any other growth" (even without any scientific understanding of what it actually is in general), fix and improve "your health" (especially for big money), and to improve the "state of your health" (especially for your own money) **THROUGH WATCHING** "online performances" with intriguingly tempting titles of videos on **YouTube**, accompanied by waving of hands, rolling of eyes, and meaningful silence; to strengthen or neutralize the effects of the vaccination you applied against some pandemic and other "**miracles in the interests of performing actions from the Curators of Orion or Sirius**" - immediately drive such scammers into the neck (you can use physical remarks!). The next short-term wave of "actors of artistic **UNDERGROUND ARROGANCE**", the primary start of whose scams were given by Ilf and Petrov (through the script "**Twelve Chairs**"), I assure you, will **NOT** be delayed **FOR LONG**. **This is not a pandemic of unreasonableness and rebellion of consciousness, this is a cheap "invasion of scammers and especially doctors of sciences"**, deployed, due to your misunderstanding and credulity to their stories and nonsense, not based on anything.

As I have already written— this information will be public and available on all our websites (and "owned" by this person), groups and clubs, and not only in Russia, but also in Europe, including Germany, America and Australia. I welcome all comments from users of the Programs and promise that these comments **WITHOUT NOTES** will be published primarily in Germany, **so that those who, no matter for what reasons, used the "services" of the Orania Center, decide for themselves what to do**. Already quite a lot of people who fell for the bait with products (I don't call it anything else) turned to me and, if I had the opportunity – and the "products" allowed me to put a Generator according to their parameters – I did it. **I hope that these people will write about it.**

And the last thing I want to say to everyone, both in Russia and abroad, and especially in Germany - the "Russian Scientific-Technical Society", or simply "RNTO", WILL NOT crawl before anyone, no matter who wants it ... the wings get in the way!

27 October, 2021

F. Shkrudnev

To be continued...
