

1.01. Knowledge from Na_chala Foreword.

Author: Shkrudnev F.D.

All "scientific" explanations quickly end up with one of the many postulates (a statement accepted without proof) and do not actually explain anything on the level of understanding the process.

Yes, we have learned to use some crumbs without understanding the essence, but this has brought us to the brink of death in a short time, and cannot serve as proof of the high level of our knowledge. We are practically powerless and defenseless before Nature, because we DO not KNOW the essence of the phenomena that occur in it and, of course, we cannot use these phenomena. These are all the consequences of a false knowledge Base that we get in the process of adapting to adulthood.

Therefore, our first task is to learn the Alphabet and Grammar of new Knowledge, which is set out on this Knowledge Platform and which will become your new Basis. Without replacing the Basis, no matter how much we strain, we will "get smarter" in the other direction; we will not be able to understand the essence of phenomena without correct initial knowledge, without a real Alphabet and Grammar. Only the replacement of the Basis - a thorough study and understanding of the relevant books - will allow you to acquire and understand new Knowledge, and their practical use.

The replacement of the Basis - a set of basic knowledge and concepts - can only happen if we make an effort and get a "correct multiplication table" in our head. Not just a cursory reading of one or all of the books, maybe even a couple of times, but a thorough study of every word, every concept, every thought, imagine everything mentally, understand how and why it works this way, and remember it all firmly.

Introduction

The material provided is a text of KNOWLEDGE, for those who are Readers of NEW KNOWLEDGE, recently made available both on the Internet and OUTSIDE IT.

THESE TEXTS are an explanatory basis for analyzing the current situation, which is now occurring, regardless of our desire or unwillingness. The questions that have been put before us over the past year speak of the growing desire of many to embark on the path of Knowledge and go this way, finding answers to those questions that "suddenly" began to interest.

We decided to choose the maximum number of texts specifically on issues related to HUMAN RECOVERY, understanding them - "what are sicknesses and diseases...", how and who "manages" the processes in the HUMAN body (in contrast to the "knowledge" that today's medicine gives us and where this "knowledge" has already led us).

The material on solving the problem "what are the SvetL PROGRAMS, how these programs help PEOPLE today in a difficult situation of the TRANSITION PERIOD, how is the recovery of the HUMAN body that used these programs going?, "will be considered in detail. Who and how can and should apply them, what types of PROGRAMS have already been tested and "launched", and what PROGRAMS will be applied in the near future.

We will use texts by the AUTHOR of these programs - the outstanding Russian scientist Nikolay Viktorovich Levashov, texts of not less prominent people such as Alexander Mikhailovich Khatibov, Nikolai Morozov and others, which have been IMPUTED to give US NEW KNOWLEDGE. Applying the knowledge of these SCIENTISTS, their non-public works and calculations (not subject to disclosure until a certain time), it was possible to build a complete concept of UNDERSTANDING, PURPOSE and MANAGEMENT of the SvetL Programs, to obtain real results of the APPLICATION of Programs (results that today's science is not able to describe, recreate and comprehend). We will comment on why this is the case and not otherwise.

These programs are now of strategic importance in their application and understanding, because they are "calculated and coordinated" with the NEW CONTROL SYSTEM for options for controlling the brain matrix with a problem dimension of 512 x 512. Special attention is paid to the Golden section and dodecahedral (icosahedral, together with the torus - during the transition period of reconstruction) structures, as the basis for building all structures on Earth.

New types of functions were created and assigned to the SvetL Programs, calculations were made for transients, and atomic diagrams, their structure, relationships, and principles of biostructure formation were obtained.

The entire frequency balance of the world around us and all biostructures is built on Prime numbers, each of which contains more than 19 digits in the 10th number system. Obtained series of Prime numbers for monitoring all major changes made under the Program, in the framework of existing "SvetL" programs.

There is practically no field where the interests of identification with modern science are affected - starting from mathematics, physics, chemistry, biology, medicine, psychology, celestial mechanics, etc.

The material presented below is presented in a summary form, since it is not a textbook and is intended only for understanding some of the basics. Most of this material, a year ago, was not intended for publication and could not be provided to those genotypes that are currently in prostration and automotor execution of the programs imputed to them, after the introduction of the "golden million" program, and subsequently recognized as FAILED. Today it is enough for them to have the TORU as the basis of obscurantism and the entire modern scientific base.

The sequence of viewing the material and LEARNING - by Chapter numbers. Provided only that a sufficient number of persons having the basis of knowledge derived from the works of N. Levashov, A. Khatybov, N. Morozov and others, whose knowledge will be presented, and who then expressed "to move forward" along the path to TRUTH and Knowledge to identify them as they perform the "program" functions already imputed to them by the NEW CONTROL SYSTEM.

In the presented materials, inserts will be MADE to explain and transform texts adapted specifically to today's ongoing processes. We do not intend to arrange discussions and further "chewing" of the above, because it is impractical and a waste of time. All the AUTHORS' works are available and well-known. Links to all available (to date) works will be re-specified. It remains only to "TURN on the BRAIN" if, of course, it is still PRESENT.

Texts containing information about Management System structures, communication types, and management forms cannot be provided ahead of time for known reasons.

Of course, without a good reason, it is difficult to force yourself to do this now. This is our mentality today. However, we don't have a different mentality yet, and we need to take ourselves by the scruff of the neck and make an effort...

But the result will exceed All your wildest expectations. When everything starts to come together in the right order in Your head over time, when disparate information begins to become one, You will begin to feel the first signs of approaching something huge, exciting and immensely interesting. You can't confuse this feeling with anything else; it can't be compared to any other...
