

WHAT IS NEW KNOWLEDGE?

Author: Ocheretyanny Yu.V.

New Knowledge - what is it? What are the processes and phenomena unknown to official science and objects of research do they declare? What is there in them that is not included in the system of human ideas about the universe?

This will be a bit of unusual information, but only at first glance. The new Knowledge that I and a considerable number of my colleagues are studying is actually not new at all.

This is the true information from the Supreme Mind of our planet, which has been hidden from people for the past 18,000 years.

Creation of a more perfect Mind.

Very briefly; the Earth and the planets of our star system are artificially created formations, created billions of years by galactic structures to ensure the existence and development of life. A living cell is also an artificially created formation, the existence of which is determined by the tact of the Earth. The Planet Earth has its own Control Complexes and various energy Objects that make up the Control System.

Our planet with all its contents living and existing on it is an energy model complex consisting of strictly organized structures that use electric and magnetic energy for their existence. The carriers of magnetic energy are a magnetic particle, and electric energy is a photon. There is also a third type of energy with its carrier - the energy of thought. Information on it is still unknown. To maintain the constant shape of objects and biological objects, the Control System uses gravitational influence.

CARRIERS OF ENERGIES

CARRIERS OF MAGNETIC ENERGY CARRIERS OF ELECTRICAL ENERGY The type of energy carrier is not yet known.
 - MAGNETIC PARTICLE - A PHOTON

The frequency range of the material WORLD, and most importantly the immaterial - the world of energies, EVERYTHING that is on the planet, is simply huge and includes energies of different frequency ranges, which we call OCTAVES, ranging from 4 vibrations per second 22 (2 octaves) to 2,512 (512 octaves) - it is simply impossible to pronounce such numbers – it is more than a hundred characters. Our planet itself is completely an energy object invisible to the human eye.

The material part of a person occupies a frequency range up to a maximum of 2 to 64 degrees of vibrations per second, but this is only the material part, the broadcasts of non-material frequency ranges occupy an order of magnitude of larger range.

Everything That Exists

The material world of our planet is a small part of the immaterial energy structure of the planet

The energies that make up everything existing on the planet, both tangible and intangible, are constantly spent, and the Earth receives from the cosmos streams of magnetic particles and photons to compensate for these energy losses of the substance of the picture of the world that we see every day.

Speaking about a human being we can say that he spends vital energy to support his life, to maintain his body form. Not only the soul essence expends energy, but any material organ of man's flesh expends and constantly receives from the planetary life support system the ENERGY PAYMENT OF COSTS for the continuous maintenance of the body and soul essence in the frequency parameters set by the Control System.

**MAGNETIC - THIS IS THE TRANSFER FROM THE SUN OF THE ENERGIES NEEDED BY THE PLANET
PRODUCED BY THE 8 MAGNETARS.**

SOLAR MAGNETS SUPPLY the interplanetary system with 500,000,000 tons per second

People exist because of the constant process of recreating the soul essence and flesh of the body, and they are not the only ones. In general, everything on our planet is subject to a process of constant feeding from magnetic and electrical energies of various parameters. You may ask, where does the planet receive so much energy, because it must be just a huge amount of magnetic and electrical energy needed to constantly recharge and maintain the shape of everything on the planet.

For the constant supply of energy to the Earth, there are special installations on the Sun and not only on it. The sun catapults 500 million tons of energy per second. The energy supply is controlled from the Earth and at the request of its Control Systems. We see all this as "magnetic storms". In fact, it is the ejection of magnetic energy flows for the needs of the existence of the entire interplanetary system and everything on it, living and inanimate.

The sun shines, but it does not warm, and this is a very correct statement ... only 8% of the heat from the Sun reaches our planet, and we get the rest of the heat through the atmosphere by changes to the local parameters of its lattice. The temperature on the planet is controlled and changed by the command of the Earth's Control System Complexes.

The sun shines but does not warm....

The distance is about 150 million kilometers

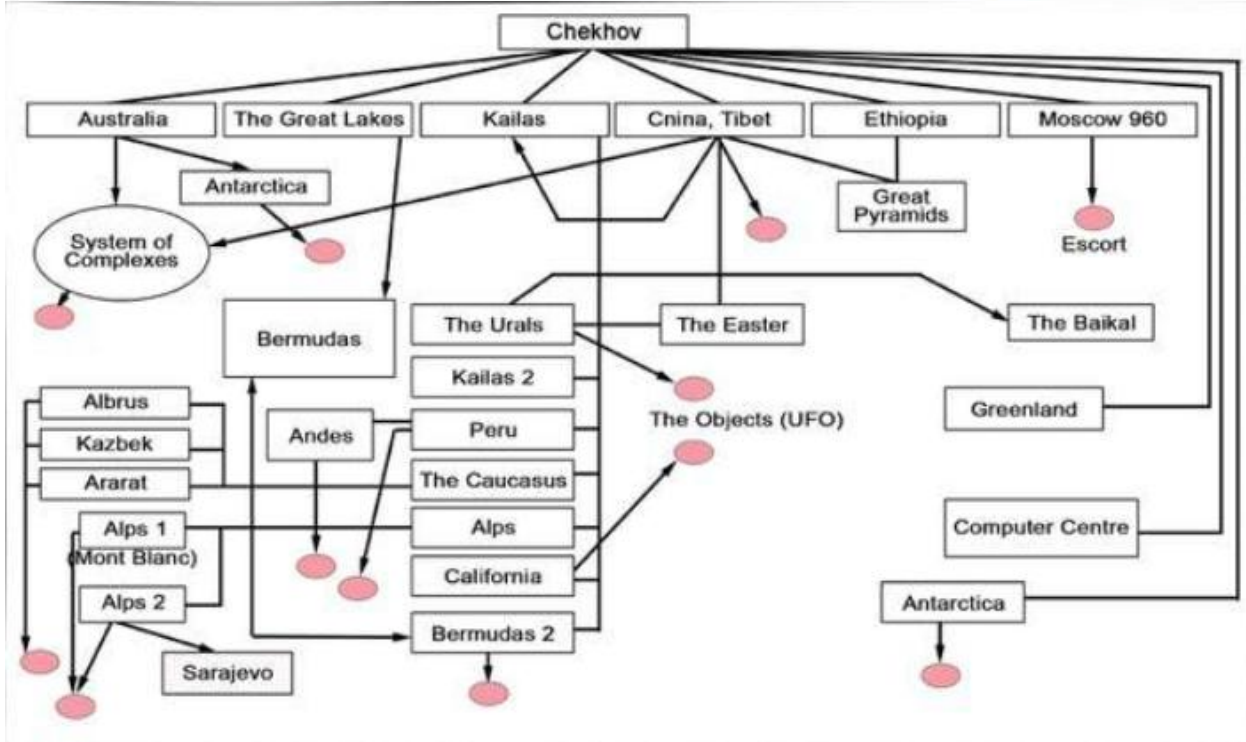

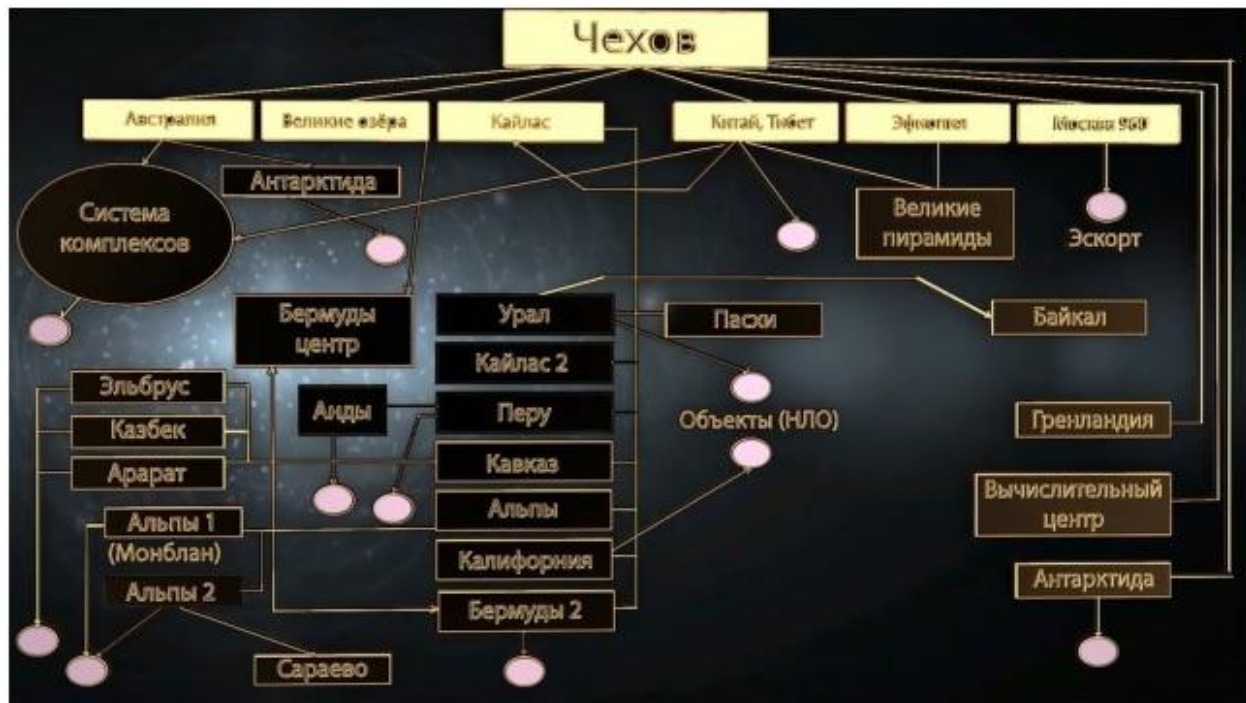

To heat the Earth from such a huge distance is at least IMPRACTICAL...there are huge energy losses for heat transfer.

Our planet warms itself by changing the local parameters of the atmospheric gratings, at the command of the Control Complexes – the values of the electric potential, the parameters of perfusion. The high air temperature is a consequence of a controlled increase in the frequency potentials of the atmospheric lattice in a particular region. Conversely, a decrease in temperature indicates the removal of potentials of the corresponding frequencies.

You can say that this is a completely different worldview! What is the Concept of this NEW WORLDVIEW offered to modern humanity?

This concept says that:

1. Our planet is controlled by a Control System located under the surface of the Earth – this is the Planetary Mind.

2. The management system is a complex hierarchical system.

3. There are more than 2000 control systems on Earth.

4. The basic brain of each individual is stored in the archive of the Control System and at each clock interval of about 1 second, depending on the genotype; the brain is monitored with the recording of new information;

7. To control the brain, the Control System uses a different musical range than that given to humans - it is 8 tones and 8 semitones. The musical sequence for controlling the brain: **DO RE MI FA SOL LA SI NA.**

The terrible numbers of the apocalypse that frighten the entire population are just a call sign for a certain genotype of the Brain code LALALA (666 - the sixth note of the scale) - call signs plus the code of the biostructure. This code ensures an error-free and ACCURATE interaction of each structure with the structures of the Control System. The code archive is necessary for the ABSOLUTE IDENTIFICATION of a Person, his location, health status, and so on. When the Brain is removed for control (realized in a dream), a DETAILED ANALYSIS of all structures is performed. The CODE is a passport of a Person in the Management System. Example code (4x4 square): 39814 106117 164131 515212 or 39814 106117 164135 152125. Therefore, there is an addressable CPS for any person without any problems. 8. Our planet was occupied more than 18,000 years ago by the alien Ebrov civilization from the Constellation Ursa Major. This is where we need to look for the roots of humanity's not very fair life all these thousands of years. All this time we have been controlled in darkness through their adherents living on our planet. Currently, no alien civilization can capture us and will inevitably be destroyed; they are already on approach to the borders of our interplanetary system.

BIO SENSORS OF THE EARTH CONTROL SYSTEM

The materialization of insects useful to mankind - locusts, bedbugs, lice, aphids and others - is performed by the Earth Control System only in the case of additional control over the frequencies that these insects have.

11. The radioisotope method cannot serve as proof of antiquity. The frequencies on which it is based appeared about 600 years ago and were introduced to control an alien control system;

12. The Moon, the Sun, and most of the satellites of the planets are subordinate structures of the Earth's Management System.

13. Without the support of the frequency balance of human life support with a special generator, none of the people living on earth will be able to overcome a height of more than 430 km above the surface of our planet. The structures of Mind and flesh will disintegrate very quickly. Astronauts who are at an altitude of 330 to 430 km, which is the limit for human health, receive an additional flow of energy from the Control System in order to be able to live and work at such an altitude. Imagine such an image.... The earth is a kind of global energy generator; the flow of life support energy from the CPS is a cable that, with increasing distance, will bring less energy to the consumer than at the beginning of the journey (energy losses for its delivery to the consumer).

15. The universe is fundamentally CONSTRUCTIVE. If you know what PLATONIC SOLIDS are, then you already have an idea of the basic elements of these constructs.

Platonic bodies

There are many more examples like this, but enough for now.

You can still give a large number of similar examples, but for the first time it is quite enough.

I am sure that many of you have already formulated the following question during the viewing:
"Where did such unusual information come from?"

I can definitely say that all existing knowledge, scientific discoveries, as before, and now can only be obtained from the Earth's Management System. They are given to comprehend and implement knowledge that will advance the evolution of the Planetary Mind of the Earth to the next stage of its development. The planetary mind can evolve only through the evolutionary development of its children – the entire population of the planet. The content of this knowledge depends on what kind of system it is, who manages it and how it is managed.

As materials of the official site of the Research Institute "Center for Proactive Strategies" tell us, an employee of this institute and I dare say a great Russian scientist Alexander Mikhailovich Khatybov "received" 1652 texts from the native Earth Control System during period 1992-1998 and at the same time he transmitted 772 texts. Decoding of the texts "was made" by the method "Kaleidoscope" created by him.

First of all, an INSTRUMENTAL BASIS was given, which made it possible to realize the true principles of Space and Time construction. Official science does not have this instrumental base.

The instrumental base of the New Knowledge includes:

- creation of special formulas, physics of atomic structures, musical table of chemical elements, etc.;
- mathematics "Kaleidoscope — 18-axis theory of symmetry (18 axes + 6 translations);
- Maxim's Laws of Motion
- the theory of prime numbers for the formation of frequencies of a living cell;
- golden section: the phyto-functions of the golden section as the basis for the formation of a living cell (2 volumes);
- development of special formulas for celestial mechanics
- a table of atomic structures and so on.

Monographs:

1. Cold nuclear fusion — 8 volumes.
2. Philosophy of Mathematics - 1 volume.
3. The Golden Section — 2 volumes, 4 appendices, including the Phyto-functions of the cell.
4. Instructions for bathing - 6 volumes, 1 appendix.
5. Management System — 3 volumes, Appendix 1 - received texts, Appendix 2 - answers.

The total volume of printed material (except calculations) is 16.5 thousand pages.

Boris Makov, Anatoly Luchin, Nikolai Levashov and Feodor Shkrudnev should also be added to the list of authors of the primary sources of New Knowledge.
