

## My Dear Friends and Colleagues!

*I want to inform, for all of us – sad news!*

Man is mortal – but that would be half the trouble! The bad thing is that sometimes he is **suddenly mortal!** I learned with regret today that on the night **of 29-30 December, 2022**, my

classmate at the M.V. Frunze Naval School, **died suddenly** in his apartment. My friend and colleague, a man who devoted his whole life to spreading New knowledge, a man who built grandiose plans for the transformation of our world, a man who discovered for people the true information about what is happening, making public all that was collected in the collective work of Russian scientists, being one of the authors of – **"The Foundations of the Formation of Humanity"** -

**BORIS VIKTOROVICH MAKOV.**

It is very difficult for me to write this now, because literally the day before, we made plans and shared thoughts about what is happening today and how to ease people's condition in this seemingly uncertainty. For me, Boris will always remain the way he was - talented, intelligent, caring, tolerant, responsive and accessible in communication. And most importantly, he will remain alive, with his smile, seriousness and understanding in his eyes, kind-hearted and wise. On the heart – of course, sadness and bitterness of loss. ***I promise that I will bring to its logical, everything that we have planned with him and will implement it into life.***

**F. Shkrudnev**
